VOLUME 5 AIRMAN CERTIFICATION

CHAPTER 2 TITLE 14 CFR PART 61 CERTIFICATION OF PILOTS AND FLIGHT INSTRUCTORS

Section 24 Conduct a Sport Pilot Certification, Including Additional Category/Class Privilege

Source Basis:

- **Title 14 CFR § 61.23, Medical Certificates: Requirement and Duration.**
- **Title 14 CFR § 61.43, Practical Tests: General Procedures.**
- **Title 14 CFR § 61.49, Retesting After Failure.**
- **Title 14 CFR § 61.51, Pilot Logbooks.**
- **Title 14 CFR Part 61 Subpart J, Sport Pilots.**
- **Title 14 CFR Part 61, Certification: Pilots, Flight Instructors, and Ground Instructors.**

5-2-24-1 REPORTING SYSTEM(S). Use Safety Assurance System (SAS) Activity Recording (AR) and use the following activity codes, as appropriate:

A. Original Sport Pilot Certification: 1508.

B. Additional Category or Class: 1505.

5-2-24-3 OBJECTIVE. This task will determine if an applicant meets the requirements for certification as a sport pilot or an additional category/class privilege under Title 14 of the Code of Federal Regulations (14 CFR) part 61 subpart J. Completion of this task results in the issuance of Federal Aviation Administration (FAA) Form 8060-4, Temporary Airman Certificate; a sport pilot certificate; FAA Form 8060-5, Notice of Disapproval of Application; or a Letter of Discontinuance.

5-2-24-5 GENERAL.

A. Sport Pilot Certificate. The sport pilot certificate permits use of aircraft that meet the sport pilot aircraft performance and design limitations listed in 14 CFR § 61.316.

B. Airworthiness Coordination.

1) Prior to conducting the practical test, the evaluator or an Airworthiness aviation safety inspector (ASI) shall review the applicant's aircraft maintenance records, aircraft logbooks, Airworthiness Certificate, and aircraft registration to determine if the aircraft is eligible and suitable for this practical test. After review, return the documents to the applicant.

2) During the practical test, the applicant will review the aircraft maintenance records, logbooks, Airworthiness Certificate, and aircraft registration for the purpose of demonstrating aeronautical knowledge on determining whether an aircraft is airworthy.

5-2-24-7 ESTABLISHING ELIGIBILITY.

A. General.

1) To be eligible for a sport pilot certificate for airplane, gyroplane, weight-shift control, powered parachute, airship, balloon, or helicopter–simplified flight controls designation, an applicant must:

a) Be at least 17 years of age.

b) Hold at least a current third-class airman medical certificate, or a valid U.S. driver's license. If the airman medical certificate bears any limitation that would make a special medical flight test necessary, refer the applicant to the responsible Flight Standards office.

NOTE: A third-class airman medical certificate or BasicMed qualification is required for sport pilot privileges being exercised at night. All other privileges only require the airman to hold at least a valid driver's license.

c) Hold a Student Pilot Certificate.

d) Meet the applicable requirements of 14 CFR part 61 subpart J.

2) To be eligible for a sport pilot certificate with a balloon or glider privilege, an applicant must be at least 16 years of age. A valid U.S. driver's license or airman medical certificate or BasicMed qualification is not required.

B. Title 14 CFR Part 141 Pilot School Graduates. If the applicant has not been issued a graduation certificate within 60 days of the practical test, as specified for graduates under 14 CFR § 61.71, the applicant must meet all applicable aeronautical knowledge, aeronautical experience, and flight proficiency requirements of 14 CFR part 61 subpart J.

C. Aeronautical Knowledge. The applicant must meet the aeronautical knowledge requirements of 14 CFR part 61 subpart J.

1) The applicant must present a Sport Pilot Airman Knowledge Test Report (AKTR), if applicable.

2) The holder of a pilot certificate is not required to take a knowledge test when adding a category/class privilege at the sport pilot level.

D. Aeronautical Experience. The applicant must present a pilot logbook training record or other reliable pilot record as evidence of meeting the aeronautical experience requirements of 14 CFR § 61.313, as applicable, for the certificate and privilege sought and must use that record to substantiate the aeronautical experience shown on FAA Form 8710-11, Airman Certificate and/or Rating Application – Sport Pilot.

E. Medical Qualification. The evaluator conducting the practical test should review the applicant's medical qualifications per 14 CFR § 61.23. Make sure the applicant possesses a current FAA medical certificate, Basic Med qualification, or a valid U.S. driver's license. If exercising night privileges, the applicant must possess a valid FAA medical or BasicMed qualification.

F. English Language Proficiency. See Volume 5, Chapter 2, Section 1 for qualification details.

G. Training. The applicant must have met the applicable pre-solo training requirements required by 14 CFR § 61.87 and have received instruction meeting the flight experience requirements of 14 CFR § 61.313. The evaluator must ensure that all required instruction is documented, and all instructor logbook endorsements are present.

H. Aeronautical Skill. The applicant must demonstrate aeronautical skill and proficiency by satisfactorily completing the practical test prescribed by 14 CFR § 61.307(b). The test will be conducted in accordance with the appropriate sport pilot practical test standards (PTS) or Airman Certification Standards (ACS).

5-2-24-9 LOGBOOK ENDORSEMENTS.

A. Flight Training. The applicant's logbook or training record must contain an endorsement from an authorized instructor who certifies the applicant has received and logged the following flight training with an authorized instructor including the areas of operation specified in 14 CFR § 61.311 in preparation for the practical test within the preceding 2 calendar months from the month of the test.

1) Airplane category, rotorcraft category, and lighter-than-air category airship class require 2 hours of flight training.

2) Gliders require the applicant has received and logged at least three training flights.

3) Lighter-than-air category, balloon class, and powered parachute category require 1 hour of flight training.

B. Practical Test Qualification. The applicant's logbook or pilot training record must contain an endorsement from an authorized instructor who certifies the applicant is prepared to pass the practical test. In addition, the applicant must have a signed FAA Form 8710-11 with the authorized instructor's signature.

C. Satisfactory Knowledge. As applicable, the applicant's logbook or training record must contain an endorsement from an authorized instructor who states that the applicant has demonstrated satisfactory knowledge of the subject areas in which the applicant was deficient on the airman knowledge test.

D. Training Required by 14 CFR Part 61 Subpart J. An applicant for a sport pilot certificate must have logged ground and flight training and received a logbook endorsement from

an authorized instructor on the training requirements specified in 14 CFR part 61 subpart J that is appropriate for the sport pilot category and class privilege sought.

E. Airplane or Helicopter Privilege. An applicant seeking to add a sport pilot airplane single-engine or rotorcraft helicopter privilege to their existing pilot certificate must accomplish a practical test with a designated examiner or ASI.

5-2-24-11 CATEGORY AND CLASS PRIVILEGES. After successful completion of the practical test, the category and class privilege may be placed on the temporary pilot certificate and will appear on the permanent certificate in the "Limitations" section. By regulation, the evaluator must provide a logbook entry for the category and class privilege.

5-2-24-13 PREREQUISITES AND COORDINATION REQUIREMENTS.

A. Prerequisites. This task requires knowledge of 14 CFR part 61 and familiarity with the applicable PTS or ACS and FAA policies.

B. Evaluator/ASI Coordination. This task may require evaluators to coordinate with the airworthiness unit, the Airmen Certification Branch (AFB-720), or the Delegation and Resource Branch (AFG-970), as appropriate.

5-2-24-15 REFERENCES, FORMS, AND JOB AIDS.

A. References (current editions):

- Title 14 CFR Parts 1, 61, 91, and 187 Appendix A.
- Sport Pilot PTS or Sport Pilot ACS, as appropriate.

B. Forms:

- FAA Form 8060-4, Temporary Airman Certificate.
- FAA Form 8060-5, Notice of Disapproval of Application.
- FAA Form 8710-11, Airman Certificate and/or Rating Application – Sport Pilot.

C. Job Aids. None.

5-2-24-17 PROCEDURES.

A. Schedule Appointment. Advise the applicant to bring the following documents to the appointment:

1) FAA Form 8710-11 may be completed using the Integrated Airman Certification and Rating Application (IACRA) and must be signed by the applicant before beginning the practical test. The applicant will complete Section III, Record of Pilot Time. The evaluator must review the applicant's aeronautical experience recorded on FAA Form 8710-11 and in the applicant's logbook or training record to ensure compliance with the appropriate aeronautical experience requirements for the certificate and/or privilege sought. The completion of section III is required to be accurately and fully completed by the applicant, per 14 CFR § 61.39(a)(7).

2) A Student Pilot Certificate, if applicable.

3) At least a third-class medical certificate, or a valid U.S. driver's license, or, if operating under BasicMed in lieu of possessing a valid medical certificate, a valid U.S. driver's license as well as a current Certificate of Completion from an authorized BasicMed medical education course, if required.

4) A Sport Pilot AKTR, if applicable.

5) An FAA-approved school graduation certificate, if applicable.

6) A logbook or other records substantiating the aeronautical experience shown on the applicant's FAA Form 8710-11.

7) The aircraft maintenance records.

8) The aircraft Airworthiness Certificate.

9) The aircraft registration.

10) An acceptable form of photo identification.

B. Applicant Arrives for Appointment.

1) Collect and review the documents indicated above.

2) An ASI will open a SAS AR record.

C. Review Application. Verify that the information on the application is presented accurately and completely.

1) In Section I, Application Information, ensure that the applicant has checked "Sport."

2) Ensure that the remainder of FAA Form 8710-11 is completed in accordance with the instructions attached to the form.

3) Ensure that the flight instructor has signed an endorsement within 2 calendar months preceding the month of application in preparation for the practical test.

D. Verify Applicant's Identity. Inspect acceptable forms of identification to establish the applicant's identity. Compare the identification with the personal information provided on the application (see Volume 5, Chapter 1, Section 3).

1) When the applicant's identity is verified, proceed with the certification.

2) If the applicant's identity cannot be verified because of lack of identification or unacceptable identification, explain what types of identification are acceptable. Advise the applicant to return with appropriate identification to reapply.

3) If the applicant's identity appears to be different from the information supplied on the application, or it appears that an attempt at falsification has been made, do not continue testing. (See Volume 5, Chapter 1, Section 3, Paragraph 5-55, Verification of Applicant's Identity, for further information.)

E. Establish Eligibility. Determine if the applicant meets the specific eligibility, knowledge, and experience requirements for certification as a sport pilot. (Refer to 14 CFR §§ 61.305, 61.307, 61.309, 61.311, and 61.313, as applicable.)

1) Ensure that the applicant holds at least a third-class airman medical certificate or valid U.S. driver's license, or is qualified in accordance with BasicMed, if required.

2) Inspect the applicant's airman medical certificate or driver's license, if appropriate, to ensure that it does not bear any limitation that would make a special airman medical flight test necessary.

3) Examine the applicant's logbook and/or training record(s) to verify current solo and solo cross-country endorsements, as appropriate.

4) Check the record of flight time in section III of FAA Form 8710-11 to determine if the applicant has the minimum aeronautical experience required for the certificate and privileges sought.

5) Examine the applicant's logbook and/or training record(s) to verify that all aeronautical knowledge, aeronautical experience, and required instructor endorsements are recorded.

6) Examine the AKTR.

7) If the applicant has checked the "Yes" box of section IV of FAA Form 8710-11, verify that the applicant meets the requirements of 14 CFR § 61.49.

8) If the applicant is applying for a test on the basis of graduation from an approved training program, inspect the applicant's graduation certificate to verify that the applicant is in compliance with the requirements of 14 CFR § 61.71.

9) If the applicant is a graduate of an approved pilot school, the evaluator should check the applicant's graduation certificate to ensure that the practical test will be able to be passed within 60 calendar days from the date on the graduation certificate. If not, the applicant must apply for the pilot certificate or privilege under 14 CFR part 61 and meet all the applicable aeronautical experience requirements under 14 CFR part 61 for the pilot certificate or privilege sought.

F. Aircraft Requirements. Ensure the applicant has the proper aircraft maintenance records, logbooks, Airworthiness Certificate, and aircraft registration to determine if the aircraft is airworthy and suitable for this practical test. After review, return the documents to the applicant. The aircraft used for the practical test must also meet the design and performance requirements of 14 CFR § 61.316.

G. Discrepancies. If a discrepancy that cannot be immediately corrected exists in any of the documents, return the application and all submitted documents to the applicant. Inform the applicant of the reasons for ineligibility and explain how the applicant may correct the discrepancies.

H. Conduct Practical Test. After determining the applicant is eligible and meets all prerequisites for the certificate/rating sought, accept the application and conduct the practical test in accordance with the applicable ACS or PTS.

1) Give an applicant who is retesting credit for the areas of operations successfully completed on the previous practical test, provided the previous test was conducted within 60 days before the retest. If the previous test was conducted more than 60 days before the retest, test the applicant in all applicable areas of operation.

2) If the practical test is not completed for reasons other than unsatisfactory performance, issue the applicant a Letter of Discontinuance (see Volume 5, Chapter 1, Sections 3 and 4). Return the application and all submitted documents to the applicant.

I. Unsatisfactory Performance. If the applicant did not meet all of the applicable PTS or ACS for the certificate sought, inform the applicant of the reasons for the unsatisfactory performance.

1) Prepare in duplicate FAA Form 8060-5 as described in Volume 5, Chapter 1, Section 6.

a) List the areas of operation that were unsatisfactory.

b) If specific procedures and maneuvers need to be repeated, record them on FAA Form 8060-5.

c) Record the number of practical test failures on FAA Form 8060-5. Give a copy of this form to the applicant.

2) As appropriate, designee evaluators will forward the completed certification file to AFG-970 no later than 7 calendar days after the completion of the test. ASIs will forward the completed certification files to AFB-720. IACRA files may be sent directly to AFB-720.

3) Return all submitted documents not forwarded to AFG-970 or AFB-720 to the applicant.

4) As appropriate, sign an entry in the applicant's records after the practical test. That entry must show the type of test, the duration of the flight portion, the unsatisfactory outcome of the test, and the evaluator's designation number.

J. Satisfactory Performance. Issue FAA Form 8060-4 when the applicant has met all requirements for the certificate and/or rating sought.

1) Prepare FAA Form 8060-4 in duplicate as indicated in Volume 5, Chapter 1, Section 5.

2) Ensure that the limitation "HOLDER DOES NOT MEET ICAO REQUIREMENTS" is noted on the Temporary Airman Certificate.

3) Complete the appropriate sections of the application.

4) Verify that all information on FAA Form 8060-4 is correct. Sign FAA Form 8060-4 and direct the applicant to sign on line vii. Give a copy of the temporary certificate to the applicant.

5) As appropriate, designee evaluators will forward the completed certification file to AFG-970 no later than 7 calendar days after the completion of the test. ASIs will forward the completed certification files to AFB-720. IACRA files may be sent directly to AFB-720.

6) Return all submitted documents not forwarded to the applicant.

7) As appropriate, sign an entry in the applicant's records after the practical test. That entry must show the type of test, the duration of the flight portion, the successful outcome of the test, and the evaluator's designation number.

K. SAS AR. An ASI will complete the SAS AR record.

5-2-24-19 TASK OUTCOMES. Completion of this task results in the issuance of one of the following:

- Temporary Airman Certificate,
- Notice of Disapproval of Application, or
- Letter of Discontinuance.

5-2-24-21 FUTURE ACTIVITIES. Applicant may return for an upgraded certificate.

5-2-24-23 through 5-2-24-37 RESERVED.
