VOLUME 5 AIRMAN CERTIFICATION

CHAPTER 2 TITLE 14 CFR PART 61 CERTIFICATION OF PILOTS AND FLIGHT INSTRUCTORS

Section 11 Conduct a Title 14 CFR Part 61 Flight Instructor Initial Certification, Additional Category/Class Ratings, Recent Experience Validation, and Reinstatement of Privileges

Source Basis:

- **Title 14 CFR Part 61, Certification: Pilots, Flight Instructors, and Ground Instructors.**
- **Title 14 CFR § 61.183, Eligibility Requirements.**
- **Title 14 CFR § 61.185, Aeronautical Knowledge.**
- **Title 14 CFR § 61.187, Flight Proficiency.**
- **Title 14 CFR § 61.191, Additional Flight Instructor Ratings.**
- **Title 14 CFR § 61.195, Flight Instructor Limitations and Qualifications.**
- **Title 14 CFR § 61.197, Recent Experience Requirements for Flight Instructor Certification.**
- **Title 14 CFR § 61.199, Reinstatement of Flight Instructor Privileges.**

5-496 REPORTING SYSTEM(S). Use Safety Assurance System (SAS) Activity Recording (AR) and use the following activity codes, as appropriate:

A. Original Certification: 1525.

B. Additional Rating: 1526.

C. Recent Experience: 1527 (Flight) and 1528 (No Flight).

D. Reinstatement: 1529.

5-497 OBJECTIVE. This task determines if an applicant is qualified for an initial flight instructor certificate, reinstatement of flight instructor privileges, validation of flight instructor recent experience, or to add an additional category or class rating to an existing certificate. Completion of this task results in the issuance of Federal Aviation Administration (FAA) Form 8060-4, Temporary Airman Certificate, with appropriate ratings; FAA Form 8060-5, Notice of Disapproval of Application; or a Letter of Discontinuance. When no flight is involved for the establishment or reestablishment of recent flight instructor experience, a Temporary Airman Certificate may not be required.

NOTE: This section does not address a flight instructor certificate with a sport pilot rating. Refer to Volume 5, Chapter 2, Section 12 and Title 14 of the Code of Federal Regulations (14 CFR) part 61 subpart K for information on the flight instructor certificate with a sport pilot rating.

5-498 GENERAL.

A. Aviation Safety Inspector (ASI) and Aviation Safety Technician (AST) Qualifications.

1) Operations ASI performing an airman certification test for a flight instructor certificate or rating must:

- Hold current and valid pilot and flight instructor certificates and ratings with the same category, class, and/or type ratings as the test being conducted.
- Meet the applicable requirements of Volume 1, Chapter 3, Sections 4, 6, and 10; and Volume 5, Chapter 1, Section 2.
- Have completed on-the-job training (OJT) for that task.

2) Operations and Flight Oversight ASIs and AST may evaluate the application from a flight instructor who is applying to establish recent flight instructor experience where no practical test is required, or who is applying to reinstate recent flight instructor experience using a flight instructor refresher course (FIRC) within 3 calendar months after the month the recent flight instructor experience period ended. They must:

- Have completed OJT for this task.
- Meet the applicable requirements of Volume 1, Chapter 3, Section 4 (ASI only).

B. Aircraft Qualification.

1) Prior to conducting the practical test, the evaluator or an Airworthiness ASI shall review the applicant's aircraft maintenance records, aircraft logbooks, Airworthiness Certificate, and aircraft registration to determine if the aircraft is eligible and suitable for this practical test. After review, return the documents to the applicant.

2) During the practical test, the applicant will review the aircraft maintenance records, logbooks, Airworthiness Certificate, and aircraft registration for the purpose of demonstrating aeronautical knowledge about how to determine whether an aircraft is airworthy. If the applicant is taking a practical test in an airplane or glider because the applicant previously failed a practical test based on not meeting the requirement to be able to teach stall awareness, spin entry, spins, and spin recovery procedures, then the evaluator must verify that the aircraft to be used is certificated for spins.

C. Knowledge Test. The flight instructor knowledge examination consists of the fundamentals of instructing (FOI) and appropriate rating tests.

1) An applicant for an initial flight instructor certificate must present two knowledge test reports:

- One for the FOI, unless test credit is given per subparagraph 5-509H7) below; and
- One for the appropriate flight instructor rating sought.

2) In addition to passing the FOI knowledge test, an applicant must also pass a second knowledge test for one of the following ratings, appropriate to the initial instructor rating sought:

- Flight Instructor, Airplane;
- Flight Instructor, Rotorcraft—Helicopter;
- Flight Instructor, Rotorcraft—Gyroplane;
- Flight Instructor, Powered-Lift;
- Flight Instructor, Instrument—Airplane;
- Flight Instructor, Instrument—Helicopter;
- Flight Instructor, Instrument—Powered-Lift; or
- Flight Instructor, Glider.

D. Category, Class, and Instrument Ratings Placed on a Flight Instructor Certificate. The following ratings are placed on flight instructor certificates where applicable:

1) Aircraft Category Ratings:

- Airplane.
- Rotorcraft.
- Glider.
- Powered-Lift.

2) Airplane Class Ratings:

- Single-Engine.
- Multiengine.

3) Rotorcraft Class Ratings:

- Helicopter.
- Gyroplane.

4) Instrument Ratings:

- Instrument—Airplane.
- Instrument—Helicopter.
- Instrument—Powered-Lift.

E. Limitations. The evaluator will not place any operating limitations on a flight instructor certificate.

F. Flight Instructor Certificates With Expiration Dates. Flight instructor certificates issued after December 1, 2024, are issued without an expiration date. In accordance with 14 CFR § 61.19(d)(2), the holder of a flight instructor certificate issued before December 1, 2024, expires 24 calendar months from the month in which it was issued, renewed, or reinstated, as appropriate. A person who holds an unexpired flight instructor certificate issued before December 1, 2024, may renew that certificate by establishing recent experience in accordance with 14 CFR § 61.197(b) prior to the month of expiration on that person's flight instructor certificate. Except as provided in 14 CFR § 61.40, if that person fails to establish recent experience prior to the expiration of that person's flight instructor certificate, that person may not exercise flight instructor privileges until those privileges are reinstated in accordance with 14 CFR § 61.199.

5-499 CONDUCT OF FLIGHT INSTRUCTOR PRACTICAL TESTS.

A. Authority and Delegation. The responsible Flight Standards office may authorize a Designated Pilot Examiner (DPE) to conduct practical tests for the recent experience, reinstatement of privileges, and addition of a rating to a flight instructor certificate through designation as a Flight Instructor Examiner (FIE). To conduct the initial issuance of a flight instructor certificate, the DPE must hold a Flight Instructor Examiner—Initial (FIEI) authorization.

1) The responsible Flight Standards office may authorize highly qualified DPEs as initial FIEs to conduct practical tests for the initial issuance of the flight instructor certificate according to the following procedures:

a) The responsible Flight Standards office must:

1. Review the qualifications of DPEs whom it deems highly qualified;

2. Notify the DPEs that they are being considered to administer the tests; and

3. Inform the DPEs that the authorization is subject to cancellation, at any time and without cause, by the responsible Flight Standards office.

b) The responsible Flight Standards office may not utilize any local scheduling procedures for DPEs authorized to conduct the initial flight instructor test except the 24-hour pretest notification. No other restrictions will be placed on the DPE to schedule a flight instructor applicant. All preapprovals will be accomplished in the FAA Designee Management System (DMS) with no further permission or procedures required.

c) The responsible Flight Standards office is not required to obtain approval before designating DPEs to conduct the practical tests for the initial issuance of a flight instructor certificate.

2) The responsible Flight Standards office is encouraged to use DPEs to conduct all practical tests to the maximum extent possible. The responsible Flight Standards office should use risk-based decision making along with surveillance to ensure these practical tests are properly administered. This policy is necessary to ensure that the FAA continues to meet its obligations to initial flight instructor applicants in a timely manner (should not exceed 30 days) while providing the highest level of safety.

3) The responsible Flight Standards office may only conduct practical tests for the initial issuance of a flight instructor certificate in unique circumstances. The office manager may assign an ASI to conduct a practical test resulting in the initial issuance of a flight instructor certificate on a case-by-case basis.

B. Graduates of 14 CFR Part 141 Approved Schools. Title 14 CFR § 141.65 authorizes some pilot schools operating under 14 CFR part 141 to hold examining authority and recommend certain graduates from its approved training course for the appropriate flight instructor certificate or rating without taking the FAA knowledge or practical test.

5-500 ESTABLISHING ELIGIBILITY.

A. Airmen Requirements for Initial Issuance. An applicant may satisfy the aeronautical knowledge requirements of 14 CFR § 61.185 by showing evidence of ground instruction in the specified areas or presenting a certified college transcript or teaching certificate. When test credit is given, a copy of the teacher's certificate should be obtained and submitted, along with the airman certification file, to the Airmen Certification Branch (AFB-720). If this is impractical, for whatever reason, the evaluator responsible for the certification file should include the following statement in lieu of a copy of the teacher's certificate: "This is to certify that I have examined the qualifications and credentials of this applicant for a [ground or flight instructor certificate] and find the credentials acceptable to meet the criteria stated in this order and appropriate to the instructor certificate sought."

1) As part of the prerequisites for a degree program, a number of colleges and universities in the United States conduct courses in aviation technology and science and require flight training. However, students attending such schools may not complete all the course requirements for the degree sought. Many of the students enrolled in aviation courses are well-qualified in the required subject areas. An applicant's knowledge in these subject areas must be determined.

2) A transcript should list the following items or their equivalents:

- Educational psychology,
- General psychology,
- Tests and measurement,
- Aviation or science teaching methods,
- Secondary school curriculum development and lesson planning, and
- Practice teaching in a classroom or on the flight line.

B. Airmen Requirements for Additional Ratings. All applicants for an added rating must complete any required knowledge test, except for an instructor adding a single-engine or multiengine class rating to an instructor certificate.

C. Record/Logbook Endorsement. An evaluator establishing the eligibility of an applicant for a flight instructor certificate must determine that the applicant meets all applicable requirements of 14 CFR part 61 subpart H. Applicants for an initial flight instructor certificate must satisfy the aeronautical knowledge requirements of 14 CFR § 61.185, as discussed in subparagraph 5-500A. To document eligibility, applicants must possess and present a record of aeronautical experience and a training record certified by the authorized instructor who provided the training for the flight instructor certificate sought. Records include logbook entries of training received and endorsements similar to the sample endorsements provided in Advisory Circular (AC) 61-65, Certification: Pilots and Flight and Ground Instructors.

NOTE: AC 61-65 provides a complete list of example endorsements required for a flight instructor practical test (initial certificate or additional rating).

D. English Language. See Volume 5, Chapter 2, Section 1 for details.

E. Medical Certificate. An applicant must hold at least a third-class medical certificate when taking a practical test in an aircraft for a flight instructor certificate (initial, additional rating, recent experience, or reinstatement of privileges), except when operating under the conditions and limitations set forth in 14 CFR § 61.113(i), as required by 14 CFR § 61.23(a)(3)(iii).

5-501 PRACTICAL TEST.

A. Conducting the Practical Test. Although evaluators judge an applicant's performance by the flight instructor Airman Certification Standards (ACS) or practical test standards (PTS) (as applicable), they may also require an applicant to demonstrate skill and knowledge from other applicable ACS or PTS such as private pilot, commercial pilot, and instrument rating.

NOTE: If the certificated flight instructor (CFI) applicant proposes to use a turbojet or fan jet, then the applicant should contact the General Aviation and Commercial Division (AFS-800).

B. Spin Training Requirement.

1) Title 14 CFR § 61.183(i)(1) requires that an applicant for a flight instructor certificate for a glider or airplane rating must have received a logbook endorsement from an authorized flight instructor who:

- Has provided the applicant with stall awareness, spin entry, spin, and spin recovery training in an aircraft of the appropriate category that is certified for spins; and
- Has found the applicant to possess instructional proficiency in stall awareness, spin entry, spin, and spin recovery procedures.

2) Title 14 CFR § 61.187(a) states that an applicant for a flight instructor certificate must have received and logged:

- Flight and ground training from an authorized instructor on the areas of operation listed in this section that apply to the flight instructor rating sought, and
- An endorsement from an authorized instructor certifying that the person is proficient to pass a practical test on those areas of operation.

5-502 REINSTATEMENT OF PRIVILEGES. A holder of a flight instructor certificate who has not complied with the recent experience requirements of 14 CFR § 61.197 may not exercise the privileges of that certificate after the end of their most recent 24 calendar-month recent experience period. A person whose flight instructor privileges have lapsed may have those privileges reinstated in accordance with 14 CFR § 61.199 by completing one of the following reinstatement requirements.

A. Flight Instructor Certification Practical Test. If 3 calendar months or fewer have passed since the last month of the flight instructor's recent experience period, the flight instructor may successfully complete an approved FIRC. If more than 3 calendar months have passed since the last month of the flight instructor's recent experience period, the flight instructor may not reinstate flight instructor privileges by completing an approved FIRC, but may reinstate privileges by satisfactorily completing:

- A flight instructor certification practical test, as prescribed by 14 CFR § 61.183(h), for one of the ratings held on the flight instructor certificate; or
- A flight instructor certification practical test for an additional rating. If appropriate, for an additional flight instructor rating, an aeronautical knowledge test may be required (refer to 14 CFR § 61.183(f)).

B. U.S. Armed Forces Instructor Pilot or Pilot Examination. In accordance with 14 CFR § 61.199(a)(3), a military instructor pilot may reinstate flight instructor privileges based on military equivalency if they provide a record showing that, within the preceding 6 calendar months from the date of application for reinstatement, they:

- Passed a U.S. Armed Forces instructor pilot or pilot examiner proficiency check; or
- Completed a U.S. Armed Forces instructor pilot or pilot examiner training course and received an additional aircraft rating qualification as a military instructor pilot or pilot examiner that is appropriate to the flight instructor rating sought.

C. Conversion to New System. The holder of a flight instructor certificate issued before November 1, 1975, that does not bear any of the new class or instrument ratings listed in 14 CFR § 61.5(c)(2), (3), or (4), may not exercise the privileges of that certificate. Until November 1, 1975, holders of those old flight instructor certificates were permitted to convert them to the new system of flight instructor certificates and ratings.

1) Applicants who failed to convert old flight instructor certificates before November 1, 1975, may reinstate those certificates under the provisions of subparagraph D below.

2) The holder of a flight instructor certificate with a glider rating does not need to convert that rating to a new class rating to exercise the privileges of that certificate and rating.

D. Reinstatement of Old Instructor Certificates. The FAA did not intend for the revision of 14 CFR part 61 to rescind any privilege previously authorized. The holder of an old flight instructor certificate issued before November 1, 1975, authorizing "FLIGHT INSTRUCTOR—AIRPLANES" or "FLIGHT INSTRUCTOR—INSTRUMENTS," may no longer exchange that certificate for a flight instructor certificate issued under revised 14 CFR part 61. However, the applicant may reinstate the old instructor certificate by passing the practical test prescribed by 14 CFR § 61.183 for each aircraft class rating sought. The FAA does not require a knowledge test.

1) An applicant who holds an old instructor certificate for "FLIGHT INSTRUCTOR—AIRPLANES" and wants flight instructor privileges for single-engine and multiengine aircraft must pass both practical tests. If only the single-engine test is completed, the applicant is issued a certificate noting "FLIGHT INSTRUCTOR—AIRPLANE SINGLE-ENGINE."

2) An applicant who holds an old instructor certificate for "FLIGHT INSTRUCTOR—INSTRUMENTS" may be issued a certificate authorizing "FLIGHT INSTRUCTOR, INSTRUMENT—AIRPLANE" and/or "FLIGHT INSTRUCTOR, INSTRUMENT—HELICOPTER," depending on the category of aircraft in which the applicant passes the practical test.

3) An applicant who holds an old instructor certificate that authorizes AIRPLANES and INSTRUMENTS may reinstate either or both privileges. An aeronautical knowledge test is not required for flight instructor ratings previously held. If the applicant satisfactorily completes the practical test for airplane instructor privileges but does not take the test for instrument rating privileges, the new flight instructor certificate would state "FLIGHT INSTRUCTOR AIRPLANE SINGLE-ENGINE, INSTRUMENT INSTRUCTOR EXPIRED [insert date]." If the applicant passes the appropriate practical test, the expired rating may be reinstated.

E. Old Flight Instructor Ratings on Pilot Certificates. An old instructor rating on a pilot certificate may not be reinstated, exchanged, or used for any current instructor privileges. A flight instructor rating or limited flight instructor rating on a pilot certificate is no longer valid and the holder may not exchange it for a similar rating or a flight instructor certificate. The holder of a pilot certificate with a flight instructor or limited flight instructor rating may be issued a flight instructor certificate only if the applicant passes the knowledge and practical tests, prescribed by 14 CFR § 61.183, for the certificate and rating sought.

5-503 REGULATORY REQUIREMENTS. In accordance with 14 CFR § 61.195, flight instructors may not conduct flight instruction in any aircraft for which they do not hold the appropriate category, class, and type ratings on both their pilot (Commercial or Airline Transport

Pilot (ATP)) and flight instructor certificates. However, in the case of those individuals who hold a flight instructor certificate with only an "INSTRUMENT—AIRPLANE," "INSTRUMENT—HELICOPTER," or "INSTRUMENT—POWERED-LIFT" rating, the following requirements apply:

A. Category and Class Rating Requirements. Title 14 CFR part 61 specifies that flight instructors who hold an "INSTRUMENT—AIRPLANE" rating only on their flight instructor certificate are authorized to give instrument flight instruction in single-engine airplanes for instrument rating certification, provided they hold an airplane category and single-engine class rating on their pilot certificate. However, for those instructors who wish to provide instrument training in a multiengine airplane, they must have an airplane category and multiengine class rating on both their pilot and flight instructor certificates.

B. Helicopter Class Rating. For those flight instructors holding an "INSTRUMENT—HELICOPTER" rating only on their flight instructor certificate are limited to conducting instrument flight training in helicopters only. The pilot candidate would be required to possess a rotorcraft-helicopter pilot certificate in advance of the instrument training. These instrument instructors cannot provide training specific to category and class rating experience requirements.

C. Flight Instructor Ratings Limited to Instrument. Instructors with ratings limited to "INSTRUMENT—AIRPLANE," "INSTRUMENT—HELICOPTER," or "INSTRUMENT—POWERED-LIFT" may only give instrument flight instruction to pilots who already hold the appropriate category and class ratings in the aircraft used for instrument flight training. This would be flight instruction leading to the addition of an instrument rating to an existing pilot certificate or the associated privileges only. These instrument-only instructors may not certify logbooks or recommend applicants for any aircraft category or class rating requirement.

5-504 FLIGHT INSTRUCTOR RECENT EXPERIENCE. Title 14 CFR § 61.197(a) prohibits a person from exercising flight instructor privileges if that person has not satisfied the flight instructor recent experience requirements within the preceding 24 calendar months. A person whose 24 calendar-month flight instructor recent experience period has not lapsed may establish a new 24 calendar-month recent experience period by satisfying one of the recent experience requirements specified in subparagraph B below.

A. Title 14 CFR § 61.197(a) Recent Experience Requirements.

1) Title 14 CFR § 61.197(a) states that a person may exercise the privileges of a flight instructor certificate only if, within the preceding 24 calendar months, that person has satisfied one of the recent experience requirements specified in 14 CFR § 61.197(b).

2) The 24 calendar-month recent experience starts from one of the following:

- The month the FAA issued the flight instructor certificate;
- The month the recent experience requirements are accomplished; or
- The last month of the flight instructor's current recent experience period provided the recent experience requirements are accomplished within the

3 calendar months preceding the last month of the certificate holder's (CH) current recent experience period.

3) If a person accomplishes the recent experience requirements of 14 CFR § 61.197(b)(1) or (2) within 3 calendar months preceding the last month of the CH's current recent experience period:

- The FAA considers that person to have accomplished the recent experience requirement of this section in the month due, and
- The flight instructor recent experience period will be reestablished for an additional 24 calendar months from the end date of the preceding recent experience period.

4) Title 14 CFR § 61.197(a)(3) states, "within the 3 calendar months preceding the last month of the certificate holder's current recent experience period," which means that in computing the 3 calendar months, one would date backward from the first day of the month even though the flight instructor recent experience period ends on the last day of the month. For example, a person whose recent experience period ends on June 30, 2025, could have completed an approved FIRC at any time on or after March 1, 2025, to June 30, 2025. Also, they could reestablish their flight instructor recent experience for an additional 24 calendar months with a new recent experience end date of June 30, 2027.

B. Title 14 CFR § 61.197(b) Recent Experience Requirements. A person whose 24 calendar-month flight instructor recent experience period has not lapsed may establish a new 24 calendar-month recent experience period if the flight instructor:

1) Passes a practical test for one of the ratings listed on the flight instructor certificate or an additional flight instructor rating; or

2) Presents at least one of the following to an evaluator:

a) A record of training students showing that, during the preceding 24 calendar months, the flight instructor has:

- Endorsed at least five applicants for a practical test for a certificate or rating, and
- At least 80 percent of those applicants passed on the first attempt of the test.

b) A record showing that, within the preceding 24 calendar months, the flight instructor has served in one of the following positions, and has knowledge of its current pilot training standards and FAA certification standards applicable to the duties and responsibilities of:

- A company check pilot,
- A chief flight instructor,
- A company check airman,

- A flight instructor in a 14 CFR part 121 or 135 operation, or
- A person in a position involving the regular evaluation of pilots.

c) A graduation certificate showing that, within the preceding 3 calendar months (of issuance), the person has successfully completed an approved FIRC, consisting of ground training or flight training, or both.

d) A record showing that, within the preceding 24 calendar months from the month of application, the flight instructor passed an official U.S. Armed Forces military instructor pilot or pilot examiner proficiency check.

e) A record showing that, within the preceding 24 calendar months from the month of application, the flight instructor has served as a flight instructor in an FAA-sponsored pilot proficiency program, provided the flight instructor meets the following requirements:

- Holds a flight instructor certificate and meets the appropriate flight instructor recent experience requirements;
- Has satisfactorily completed at least one phase of an FAA-sponsored pilot proficiency program in the preceding 12 calendar months;
- Has conducted at least 15 flight activities recognized under the FAA-sponsored pilot proficiency program during which the flight instructor evaluated at least 5 different pilots and has made appropriate endorsements in the logbook of those pilots.

NOTE: Currently, only the FAA's Pilot Proficiency Program (WINGS) is eligible to meet this recent experience provision. Refer to AC 61-91, WINGS—Pilot Proficiency Program, for information on the WINGS Program.

C. Title 14 CFR § 61.197(b)(2)(ii) Recent Experience Requirements. A flight instructor who serves "in a position involving the regular evaluations of pilots" and within their 24 calendar-month recent experience period may reestablish their recent experience under 14 CFR § 61.197(b)(2)(ii). The FAA notes that activities involving the regular evaluation of pilots do not encompass pilot training activities, including student pilot training. Therefore, these regular training duties conducted under 14 CFR part 61 or 141 by a person who holds a flight instructor certificate do not meet the requirements to establish flight instructor recent experience under 14 CFR § 61.197(b)(2)(ii).

1) The FAA intends the phrase "in a position involving the regular evaluation of pilots" to encompass a variety of activities within various parts of 14 CFR. Regardless of the regulatory part the flight instructor serves under, evaluators should become acquainted with the duties and responsibilities of the applicant's position. To meet this goal and document the applicant's eligibility for certificate renewal under this section, the applicant should supply a company manual, which describes the duties and responsibilities of that applicant. This documentation should provide evidence that the applicant possesses knowledge of current FAA pilot training policies, training standards, and the FAA certification processes. The applicant should also provide a letter, on a company letterhead from a management official of that company, attesting that the applicant performed duties and responsibilities involving the regular

evaluation of pilots during the previous 24 calendar months. Evaluators should (1) review evidence of the applicant's employment, which should clearly show that the applicant is in a position involving the regular evaluation of pilots; (2) verify that the applicant has satisfactory knowledge of current FAA pilot training policies and standards; and (3) verify that the applicant has satisfactory knowledge of the FAA certification processes before renewing that applicant's flight instructor certificate. The following examples describe positions in which applicants may qualify for flight instructor certificate renewal under 14 CFR § 61.197(b)(2)(ii):

- A pilot in command (PIC) of a multiple-pilot flightcrew aircraft under 14 CFR part 121,
- A PIC of a multiple-pilot flightcrew aircraft under 14 CFR part 135,
- A PIC of a multiple-pilot flightcrew aircraft under 14 CFR part 91 subpart K (part 91K) or 125,
- U.S. military pilots who are PICs of multiple-pilot flightcrew aircraft,
- U.S. military instructor pilots and examiners who regularly evaluate pilots, and
- FAA DPEs or Pilot Proficiency Examiners (PPE).

2) A holder of a current flight instructor certificate who has been designated as a Master Instructor by the National Association of Flight Instructors (NAFI) and Master Instructor Continuing Education Program (MICEP) within their current recent experience period may renew their flight instructor recent experience period.

D. Title 14 CFR § 61.197(b)(2)(iii) Recent Experience Requirements. Individuals have asked whether a person who elects to attend an approved FIRC more than once every 24 calendar months would be permitted to reestablish their flight instructor recent experience more frequently. Even though the rule was written in a permissive format, it does not preclude a person from establishing their flight instructor recent experience once a year or more if the person chooses to establish recent experience by attending an approved FIRC with greater frequency. However, for an applicant who establishes their flight instructor recent experience outside the 3 calendar-month window (refer to 14 CFR § 61.197(a)(3)), the new recent experience end date will be 24 calendar months from the month the recent experience requirements are accomplished.

E. Procedures for Validating Flight Instructor Recent Experience Via U.S. Mail. Flight instructor's seeking to validate their recent experience can establish their flight instructor recent experience on a personal computer workstation and complete an approved FIRC over the internet. AFS-800 has approved procedures that will allow a flight instructor whose recent experience has not lapsed (meaning the flight instructor has satisfactorily accomplished the recent experience requirements and submitted an application prior to the last day of their current 24 calendar-month recent experience period) to reestablish their recent experience by sending the application to their responsible Flight Standards District Office (FSDO) via the mail delivery. The following procedural requirements must be followed to accomplish the validation of flight instructor recent experience via the mail delivery service:

1) The flight instructor establishing recent experience is required to submit an original completed FAA Form 8710-1, Airman Certificate and/or Rating Application.

2) The flight instructor establishing recent experience must submit a copy of their identification that contains a picture of the applicant (e.g., a driver's license, military ID card, etc.). That copy of the applicant's identification document must be notarized by a notary public.

3) If the flight instructor is establishing recent experience on the basis of 14 CFR § 61.197(b)(2)(i) or (ii), the applicant must provide copies of the records that substantiate the training of "at least 5 applicants for a practical test for a certificate or rating and at least 80 percent of all applicants endorsed passed that test on the first attempt," or having served as a "company check pilot, chief flight instructor, company check airman, or flight instructor in a part 121 or 135 operation, or in a position involving the regular evaluation of pilots." Those records must be notarized by a notary public.

4) If the flight instructor is establishing recent experience on the basis of satisfactory completion of a FIRC (i.e., 14 CFR § 61.197(b)(2)(iii)), the instructor will be required to submit a copy of their graduation certificate.

5) If the flight instructor is establishing recent experience on the basis of 14 CFR § 61.197(b)(2)(iv), the flight instructor must provide a copy of the record showing that, within the preceding 24 months from the month of application, the flight instructor passed an official U.S. Armed Forces military instructor pilot or pilot examiner proficiency check. This record must be an official military record that documents that the applicant passed a U.S. Armed Forces military instructor pilot or pilot examiner proficiency check.

6) The responsible FSDO will then process and submit the application file to AFB-720 via mail to P.O. Box 25082, Oklahoma City, OK 73125. The FSDO will contact the flight instructor to resolve any application errors or discrepancies prior to forwarding to AFB-720.

F. Recent Experience on the Basis of Acquaintance. The FAA has been asked whether 14 CFR § 61.197 prevents a flight instructor from establishing recent experience on the basis of acquaintance. Historically, 14 CFR § 61.197 never allowed a person to renew a flight instructor certificate, which previously had an expiration date, merely on the basis of acquaintance. The misconception was erroneously promulgated in the "Aviation Safety Inspector or Technician Report" section on the back of FAA Form 8710-1. The FAA never intended or permitted that an applicant's flight instructor certificate be renewed merely on the basis of acquaintance. FAA policy has always required evaluators to see evidence of the applicant's employment, which should clearly show that applicants are in a position involving the regular evaluation of pilots, or to have personal knowledge of an applicant's flight instructing capabilities and qualities before validating the establishment of that flight instructor's recent experience.

G. Title 14 CFR § 61.197(d) Recent Experience Requirements. This section states that instructors may accomplish the practical test required by 14 CFR § 61.197(b)(1) in an approved flight simulator or flight training device if they accomplish the test pursuant to an approved course conducted by a training center certificated under 14 CFR part 142.

H. Denial Based on a Disapproved Practical Test. If an applicant is unable to meet the requirements for flight instructor recent experience or reinstatement of flight instructor privileges by satisfactorily completing the applicable practical test, the evaluator issues the applicant an FAA Form 8060-5. If recent experience or reinstatement of privileges has been denied on the basis of the applicant's piloting proficiency, designees should document the deficiencies and contact their responsible Flight Standards office for possible reexamination consideration. Except for a retest, the FAA does not require a flight instructor recommendation for the recent experience or reinstatement of flight instructor privileges. However, a flight instructor may recommend additional preparation to the flight instructor applicant.

5-505 DESIGNATED PRACTICE AREAS. During routine surveillance and at FIRCs, evaluators should emphasize to flight instructors and flight instructor applicants that they can enhance safety by conducting student instruction and solo practice within designated areas known to air traffic control (ATC) and FSDOs.

5-506 AIRMAN MEDICAL AND FLIGHT INSTRUCTOR CERTIFICATES. The following information provides clarification on the medical certification requirement for flight instructors. FSDOs commonly receive the following inquiries:

- May a flight instructor who does not hold a valid airman medical certificate act as a required flightcrew member?
- May a flight instructor who does not hold a valid airman medical certificate conduct flight instruction if they meet BasicMed requirements as set forth in 14 CFR § 61.113(i)?
- May a certificated pilot who does not hold a valid airman medical certificate renew a flight instructor certificate?
- May a certificated pilot who does not hold a valid airman medical certificate be issued an initial flight instructor certificate?

A. Required Flightcrew Member. BasicMed privileges extend to required flightcrew members, including required flightcrew members not acting as PIC.

B. Flight Instructor Acting as PIC or Required Flightcrew Member. Operations under BasicMed extend to flight instructors because a flight instructor is only exercising the privileges of a private pilot. Therefore, an FAA-authorized flight instructor may provide flight instruction while that person is the acting PIC or required flightcrew member of that instructional flight and is operating under BasicMed (refer to 14 CFR § 61.3(c)(2)(xiv)).

1) Title 14 CFR § 61.3(c)(1) states that no person may act as a PIC, or in any other capacity as a required flightcrew member of an aircraft, while exercising the privileges of a certificate issued under 14 CFR part 61 unless that person has, in their possession, an appropriate current medical certificate issued under 14 CFR part 67.

2) Title 14 CFR § 61.3(c)(2) provides an exception to this requirement. It states, "A person is not required to meet the requirements of paragraph (c)(1) of this section if that person— […] (xiv) Is exercising the privileges of a flight instructor certificate and acting as pilot

in command or a required flightcrew member for operations conducted under the conditions and limitations set forth in § 61.113(i) and holds a U.S. driver's license."

C. Not PIC or Required Crewmember. A flight instructor who is on board an aircraft for the purpose of providing flight instruction and does not act as a PIC or as a required flightcrew member is not performing a function or exercising pilot privileges that would require them to possess an appropriate current medical certificate in accordance with 14 CFR part 61. Therefore, the FAA does not require a flight instructor who does not exercise pilot privileges as a PIC or required crewmember (such as acting as a safety pilot as described in 14 CFR § 91.109(c)) while giving flight instruction to have a valid medical certificate.

D. BasicMed. The BasicMed rules in 14 CFR parts 61, 68, and 91 became effective May 1, 2017. These rules provide an alternative to the third-class medical certificate for eligible pilots that comply with BasicMed rules. The BasicMed privileges apply to persons exercising student, recreational, and private pilot privileges. BasicMed also applies to persons exercising flight instructor privileges when acting as a PIC or a required flightcrew member. This is because a flight instructor who is acting as PIC or a required flightcrew member and is receiving compensation for their flight instruction is only exercising the privileges of a private pilot. AC 68-1, BasicMed, provides additional information.

E. Public Queries. Evaluators receiving questions concerning the information above should ensure that the following points are emphasized in discussion with pilots:

1) A flight instructor who acts as a safety pilot during simulated instrument flight, as required by 14 CFR § 91.109(b)(2), is a required pilot flightcrew member and must have an appropriate, current medical certificate or meet the requirements of BasicMed as set forth in 14 CFR § 61.113(i). Flightcrew members who are not acting as PIC or a required flightcrew member cannot fly under BasicMed.

2) A flight instructor who conducts a flight review (required by 14 CFR § 61.56) after a pilot's currency has expired must act as PIC and have the appropriate current medical and pilot certificates or meet the requirements of BasicMed as set forth in 14 CFR § 61.113(i) and hold the appropriate pilot certificates.

3) A flight instructor who gives flight instruction and acts as PIC in the capacity of a required pilot flightcrew member must have a valid medical certificate or meet the requirements of BasicMed.

4) A flight instructor who is not acting as PIC but gives flight instruction and acts in the capacity of a required pilot flightcrew member must have a valid medical certificate or meet the requirements of BasicMed as set forth in 14 CFR § 61.113(i).

5) A flight instructor who does not hold a current medical certificate or meet the requirements of BasicMed set forth in 14 CFR § 61.113(i) may give, and charge a fee for, flight instruction during any flight in which the certificated pilot being instructed (other than a student pilot) is the PIC, provided the flight instructor at least holds commercial pilot privileges on their pilot certificate and does not act as a required pilot flightcrew member.

6) A flight instructor who contemplates the use of a flight instructor certificate when they do not hold an appropriate, current medical certificate or meet the requirements of BasicMed should be fully aware of the various circumstances under which they may be required to assume responsibility for the safety of the aircraft during flight and remain in compliance with applicable regulations.

5-507 PREREQUISITES AND COORDINATION REQUIREMENTS.

A. Prerequisites. This task requires knowledge of the requirements of 14 CFR part 61 and FAA policies.

B. Coordination. This task may require coordination with the airworthiness unit and AFB-720.

5-508 REFERENCES, FORMS, AND JOB AIDS.

A. References (current editions):

- Title 14 CFR Parts 1, 61, 91, 141, 142, and 187 Appendix A.
- Volume 5, Chapter 14, FAA English Language Standard for Certification Under 14 CFR Parts 61, 63, 65, and 107.
- AC 60-28, FAA English Language Standard for an FAA Certificate Issued Under 14 CFR Parts 61, 63, 65, and 107.
- AC 61-65, Certification: Pilots and Flight and Ground Instructors.
- AC 68-1, BasicMed.
- Applicable ACS or PTS (as applicable).

B. Forms:

- FAA Form 8060-4, Temporary Airman Certificate.
- FAA Form 8060-5, Notice of Disapproval of Application.
- FAA Form 8710-1, Airman Certificate and/or Rating Application.

C. Job Aids. Sample letters and figures.

5-509 PROCEDURES.

A. Schedule Appointment. Advise the applicant to bring the following documents to the appointment:

- FAA Form 8710-1.
- A Commercial Pilot or ATP Certificate.
- A flight instructor certificate (if applicable).
- At least a current third-class airman medical certificate or, if operating under BasicMed in lieu of possessing a valid third-class medical certificate, a valid U.S. driver's license as well as a current Certificate of Completion from an authorized BasicMed medical education course, if applicable.

- A knowledge test report (if required).
- A graduation certificate from an approved training program under 14 CFR part 141 or 142 (if required by 14 CFR § 61.71).
- Personal logbooks and/or training records that substantiate the flight experience shown on the application form.
- The aircraft maintenance records.
- The aircraft Airworthiness Certificate.
- The aircraft registration.
- An acceptable form of photo identification.
- The Federal Communications Commission (FCC) aircraft station license documents, if applicable.

B. Applicant Arrives for Appointment.

1) Collect the documents indicated above.

2) An ASI and AST evaluator will open the SAS AR record.

C. Integrated Airman Certification and Rating Application (IACRA). The applicant is encouraged to utilize the IACRA system whenever possible for all applications for pilot certificates and ratings.

1) IACRA can be accessed at https://iacra.faa.gov/iacra.

2) The guidance contained in the rest of this paragraph can be applied to applications made through IACRA as well as applications using the paper FAA Form 8710-1, although the process steps may be performed in a different order. References to the instructions for FAA Form 8710-1 should be taken to also include the IACRA work instructions.

3) Notwithstanding the guidance below, no documentation should be mailed to AFB-720 when completing the application via IACRA. See Volume 5, Chapter 2, Section 4, Subparagraph 5-287C, Corrections to an IACRA File After Transmission to AFB-720, for guidance on how to process corrected IACRAs.

D. Review Application.

1) In section I of FAA Form 8710-1, ensure that the applicant has checked "Flight" and "Initial," "Recency," or "Reinstatement," as appropriate to the practical test or recent flight instructor experience being requested. The applicant must complete sections I, II, IV, and V. Section I must have parts A through O1 completed in their entirety. If a flight test is administered, section IIA1 must indicate the aircraft used during the flight test and the "Total Time" in block 2a. The aircraft listed must match the aircraft listed on the reverse side of the application. Section IIC must be completed when the applicant graduated from an FAA-approved course (this does not include FIRCs). Ensure the applicant has given the school's name and location (city and state). If the application is for an added flight instructor rating, then the applicant must show 15 hours of PIC time in the category and class of aircraft appropriate to the rating sought. Section IV must be answered "YES" or "NO" if a flight test was administered.

If "YES," ensure the airman's FAA Form 8060-5 is included with the approved application. If the applicant has lost their copy of the form, attach a statement to that affect. Section V must be signed and dated by the applicant.

2) Check the application for accuracy, using the instructions attached to FAA Form 8710-1.

3) Check to make sure a flight instructor applicant has a logbook endorsement, a signed application, or a written statement signed by the recommending flight instructor no more than within 2 calendar months preceding the month of the practical test.

4) The date the evaluator places next to their signature on the application must be the same date as on the temporary flight instructor certificate.

a) For applications to establish flight instructor recent experience, the date the evaluator places next to their signature must be a date that is on or before the last day of their 24 calendar-month recent experience period. In the past, some evaluators have dated the application and temporary flight instructor certificate using a date that was after the last month of the recent experience period. For recordkeeping purposes for AFB-720, it is mandatory that the date on the application and temporary flight instructor certificate be the same date and be a date that is on or before the last day of their 24 calendar-month recent experience period.

b) Provided the flight instructor established recent experience in the 3 calendar months preceding the last month of their 24 calendar-month recent experience period or during the last month of their recent experience period, that flight instructor's new 24 calendar-month recent experience shall start from the last month of the flight instructor's current recent experience period.

5) In section III of the application, confirm that the applicant listed at least the aeronautical experience required for the airmen certificate and rating sought. Graduates of 14 CFR part 141 pilot schools or 14 CFR part 142 training centers must provide their aeronautical experience on the application even though the graduation certificate is evidence of having completed the course of training. If aeronautical experience has no bearing on the airmen certification action being sought, it is not necessary for an applicant to complete section III. For example, flight instructor recent experience applications, applications to reinstate flight instructor privileges, ground instructor qualification applications, and pilot type rating applications are examples for which aeronautical experience would not have a bearing on the airmen certification action and thus the applicant would not be required to complete section III. However, the FAA encourages all applicants to complete section III of the application. This is because the application remains on file with the FAA and can be used to substantiate past aeronautical experience if an individual were to ever lose their logbook.

E. Verify Applicant's Identity. Inspect acceptable forms of identification to verify the applicant's identity. Compare the identification with the personal information provided on FAA Form 8710-1. (See Volume 5, Chapter 1, Section 3.)

1) If the applicant's identity can be verified, proceed with the task.

2) If the applicant's identity cannot be verified because of lack of or inadequate identification, explain what types of identification are acceptable. Advise the applicant to return with the appropriate identification to reapply.

3) Do not continue with this task if:

- The applicant's identity appears to be different from the information supplied on FAA Form 8710-1.
- It appears that an attempt at falsification has been made.

F. General Procedures for Establishing Recent Experience or Reinstatement of Flight Instructor Privileges. An evaluator may require an applicant establishing recent experience or reinstating flight instructor privileges to complete all or any portion of the flight instructor practical test that the evaluator deems necessary to determine the applicant's competence to hold a flight instructor certificate. The minimum required tasks that an applicant needs to accomplish for recent experience or reinstatement of privileges are covered in the applicable flight instructor ACS or PTS.

1) A flight instructor endorsement is not required to establish recent experience or reinstate flight instructor privileges except in accordance with the provisions of 14 CFR § 61.49 for a retest after failure.

2) A flight instructor who establishes recent experience or reinstates privileges begins a new recent experience period which extends for 24 calendar months after the month of the recent experience validation or reinstatement was accomplished, or the last month the current recent experience period, provided the provisions of 14 CFR § 61.197(b) are accomplished within the 3 calendar months preceding the last month of the current flight instructor recent experience period.

3) In order to conduct a practical test to establish recent experience for a flight instructor certificate with more than one aircraft category rating, an evaluator must be qualified to conduct a practical test in at least one of the aircraft categories on the flight instructor certificate to be tested.

4) An applicant may establish recent experience for all ratings on a flight instructor certificate by satisfactorily completing one practical test. Also, the satisfactory completion of a practical test for an additional flight instructor rating reestablishes flight instructor recent experience.

G. Flight Instructor Recent Experience Based on Completion of a FIRC in Accordance With 14 CFR § 61.197(b)(2)(iii). See subparagraph 5-504D. When validating flight instructor recent experience, the evaluator must perform the following:

1) Review the recent experience applicant's FAA Form 8710-1 to ensure that the applicant has fully completed the front of the application and has signed and dated the application. If the FIRC is an approved 14 CFR part 141 training course, ensure that the applicant has completed section IIC of the application. This area is only completed if the FIRC

provider and course is an approved 14 CFR part 141 training course and the applicant has received a graduation certificate from that training course.

2) If the FIRC provider has an Airman Certification Representative (ACR) assigned, ensure the ACR has completed the "Designated Examiner or Airman Certification Representative Report" section on the reverse side of the applicant's FAA Form 8710-1. The marked boxes in Figure 5-242, Sample FAA Form 8710-1, Airman Certificate and/or Rating Application (Page 2) (For Flight Instructor Recent Experience Validation Based on a FIRC Completed by an Airman Certification Representative), show the correct boxes to be completed by an ASI or AST evaluator. Additionally, the ACR is required to complete the other areas in Figure 5-242 noted as "To be completed by the ACR" in the "Aviation Safety Inspector or Technician Report" section of the form.

3) If being reviewed by an ASI or AST evaluator, complete the "Aviation Safety Inspector or Technician Report" section on the reverse side of the form. The marked boxes in the sample form in Figure 5-242 need to be completed by an ASI or AST evaluator.

4) Sign and date the application.

H. Establish Eligibility.

NOTE: Refer to 14 CFR §§ 61.183, 61.185, 61.187, and 61.191.

1) Ensure that the applicant holds either a Commercial Pilot or an ATP Certificate with aircraft category and class ratings appropriate to the instructor rating sought. If the applicant is applying for a flight instructor certificate with an airplane or powered-lift category rating or an instrument rating, verify that the applicant has an instrument rating appropriate for the flight instructor rating sought.

2) Inspect the applicant's medical certificate and Statement of Demonstrated Ability (SODA), if applicable, to ensure that it is appropriate to the pilot privileges being exercised. If the applicant is establishing medical eligibility using BasicMed as set forth in 14 CFR § 61.113(i) rather than a medical certificate, the applicant must provide the necessary documentation (a valid driver's license and a Certificate of Completion of a BasicMed medical education course as required under 14 CFR § 61.23(c)(3)(i)(C)). While an applicant operating under BasicMed is required to maintain the Comprehensive Medical Examination Checklist in their logbook in accordance with 14 CFR § 61.113(i)(3)(i), the evaluator should not ask to inspect the document due to the private medical information contained therein. The evaluator must also confirm with an applicant operating under BasicMed that:

a) They have held a medical certificate at any point after July 14, 2006;

b) The most recent medical certificate held has not been suspended or revoked;

c) If an authorization for a special issuance was issued, it was not withdrawn; and

d) The most recent application for an airman medical certificate submitted to the FAA has not been completed and denied.

3) Determine whether the applicant is able to read, write, and converse fluently in the English language (see subparagraph 5-500D).

4) If the applicant graduated from an FAA-approved training program under 14 CFR part 141 or 142, have the applicant present the appropriate graduation certificate. Verify that the date issued shows that the applicant graduated within the past 60 days.

5) If the applicant is not a graduate of an FAA-approved training program under 14 CFR part 141 or 142 and is applying for a flight instructor certificate, have the applicant present evidence of passing a course of instruction in the subjects listed in 14 CFR § 61.185.

6) Determine if 14 CFR § 61.185(a) requirements are met by having the applicant present evidence of one of the following:

- Satisfactory completion of a home study course or any of the alternatives outlined in AC 61-65, or
- A certified college transcript listing subjects equivalent to the subjects listed in 14 CFR § 61.185(a).

7) Determine whether an applicant is required to receive and log ground training from an authorized instructor on the FOI and take the FOI knowledge test by examining the following substitutes:

- A current teacher's certificate issued by a state, county, city, or municipality that authorizes the applicant to teach at an educational level of the 7th grade or higher;
- Proof of regular employment as an instructor in an accredited college or university; and/or
- The applicant's flight instructor certificate or ground instructor certificate with any rating.

8) Determine if the applicant satisfies the requirements of 14 CFR § 61.185(a) by an endorsement from a flight or ground instructor, who meets the requirements of 14 CFR § 61.185(a), certifying that the prescribed instruction was given.

9) Request and examine any of the following documents, which qualify as acceptable evidence of having passed the appropriate knowledge tests:

- Two knowledge test reports, one for the appropriate instructor rating and one for the FOI;
- Test reports from an FAA-approved school with knowledge test examining authority; and/or
- A computer test report from an approved computer testing center.

10) If the applicant is not a graduate of an FAA-approved training program under 14 CFR part 141 or 142, have the applicant present a logbook endorsement. Ensure that the instructor has signed it and certifies that the applicant is competent to pass a practical test on the required subjects listed in 14 CFR § 61.187(b).

11) For initial flight instructor certification, the instructor who provides the training and the instructor who recommends the applicant must meet the requirements of 14 CFR § 61.195(h).

12) If the applicant has failed the flight (aircraft)-rating practical test, make sure that applicant submits an FAA Form 8710-1 with the instructor's recommendation for the retest.

13) Determine if the applicant for an additional flight instructor rating meets specific eligibility requirements, as listed in 14 CFR § 61.191.

14) Has at least 15 hours of PIC time in the category and class of aircraft appropriate to the rating sought. The record of flight time in section III of the application must show at least the minimum flight experience required for the additional rating sought.

15) Determine if the applicant establishing flight instructor recent experience or reinstating flight instructor privileges meets specific eligibility requirements of 14 CFR § 61.197 or § 61.199, as appropriate.

I. Aircraft Requirements. The evaluator conducting the practical test or an Airworthiness ASI should review the applicant's aircraft maintenance records, aircraft logbooks, Airworthiness Certificate, FCC license (if applicable), and aircraft registration to determine if the aircraft is eligible and suitable for this practical test. After review, return the documents to the applicant.

J. Discrepancies. If a discrepancy that cannot be immediately corrected exists in any of the documents presented by the applicant, the evaluator should return the application and all submitted documents to the applicant. The evaluator should then inform the applicant of the reasons for ineligibility and explain how the applicant may correct the discrepancies. Since eligibility must be established before the practical test begins, the evaluator will not issue FAA Form 8060-5 or a Letter of Discontinuance.

K. Conduct Practical Test. After determining if the applicant is eligible and meets all prerequisites for the flight instructor certificate and associated ratings they are applying for, the evaluator may start the practical test.

1) Use the procedures and maneuvers outlined in the applicable flight instructor ACS or PTS for the category and class of aircraft or instrument aircraft rating.

2) Give credit to the applicant who retests tasks already completed on the previous practical examination (evaluator's option).

3) If the applicant's flying proficiency is seriously in doubt, evaluators should document the deficiencies and contact their responsible Flight Standards office for possible

reexamination consideration of the applicant's pilot certificate in accordance with Title 49 of the United States Code (49 U.S.C.) § 44709 and FAA guidance. (See Volume 5, Chapter 7, Section 1.)

4) Close the SAS AR record.

L. Unsatisfactory Performance. Upon determining that an applicant's practical test performance is not satisfactory, the evaluator should discontinue the practical test and inform the applicant of the reason(s) why the area of operation was unsatisfactory. However, the evaluator has the option to continue the practical test if the applicant agrees. This gives the applicant the chance to complete the other required areas of operation and associated tasks.

1) Prepare in duplicate FAA Form 8060-5 (see Volume 5, Chapter 1, Section 6, Issuance of Notices of Disapproval of Application).

2) Forward the certification file to AFB-720.

M. Satisfactory Performance. The evaluator should issue a Temporary Airman Certificate (FAA Form 8060-4) to the applicant who meets all requirements for a flight instructor certificate. Flight instructors establishing recent experience or reinstating privileges for flight instructor certificates issued after December 1, 2024, will not require a Temporary Airman Certificate except for recent experience or reinstatement based on a practical test for an additional flight instructor rating.

1) Prepare FAA Form 8060-4 in duplicate, as indicated in Volume 5, Chapter 1, Section 5.

2) Enter the following ratings, when appropriate, on the certificate:

- Airplane—Single-Engine;
- Airplane—Multiengine;
- Instrument—Airplane;
- Instrument—Helicopter;
- Rotorcraft—Helicopter;
- Rotorcraft—Gyroplane;
- Glider;
- Powered-Lift; and
- Instrument—Powered-Lift.

3) Enter the following mandatory limitation for a CFI certificate: "VALID ONLY WHEN ACCOMPANIED BY PILOT CERTIFICATE NO. xxxxxxx."

4) Inform the applicant that the flight instructor recent experience period ends at the end of the 24th calendar month after the month the certificate is issued, except for recent experience accomplished within the 3 calendar months preceding the last month of the CH's current recent experience period.

5) Use the same certificate number on the temporary certificate that is on the superseded flight instructor certificate, or in the case of an original certificate issuance, the certificate number on the applicant's pilot certificate followed by the letters "CFI."

6) If the flight instructor applicant is applying for a Gold Seal Certificate, see Volume 5, Chapter 2, Section 13 to determine eligibility. Only ASI and AST evaluators are authorized to issue the initial gold seal on a flight instructor certificate. An evaluator who is authorized to conduct flight instructor recent experience or reinstatement practical tests or validate flight instructor recent experience (e.g., a Flight Instructor Renewal Examiner (FIRE)) may validate a new recent experience period or reinstate flight instructor privileges for a flight instructor with a gold seal already on their flight instructor certificate. The holder of a gold seal flight instructor certificate is not required to meet the criteria for the gold seal again. A flight instructor who qualifies for a gold seal is entitled to receive another gold seal on any reissuance of that flight instructor certificate and retains the gold seal when establishing a new recent experience period or reinstates privileges.

7) Complete the "Aviation Safety Inspector or Technician Report" or "Designated Examiner or Airman Certification Representative Report" section, as appropriate, and the "Attachments" section on FAA Form 8710-1. Sign the reverse side of FAA Form 8710-1.

8) Forward the completed file to AFB-720.

9) Return to the applicant all submitted documents not forwarded to AFB-720.

N. SAS AR. An ASI or AST will complete the SAS AR record, as appropriate.

5-510 TASK OUTCOMES. Completion of this task may result in the issuance of one of the following:

- Temporary Airman Certificate,
- Notice of Disapproval of Application, or
- Letter of Discontinuance.

5-511 FUTURE ACTIVITIES.

A. Recent Experience or Reinstatement of Privileges. The applicant may return to establish recent experience or reinstate privileges.

B. Additional Flight Instructor Rating. The applicant may return for an additional flight instructor rating.

Figure 5-50. Sample Letter of Discontinuance

FAA letterhead

[Date]

[Applicant's name and address]

Dear [applicant's name]:

On this date, you successfully completed the oral portion of the practical test for a [indicate grade] certificate with an [indicate category] and [indicate class] class rating. The practical test was discontinued because of [indicate reason].

If application is made by [indicate date 60 days from date of letter], this letter may be used to show the following portions of the practical test which have been completed satisfactorily:

[Indicate areas of operation completed on the test]

After [indicate expiration date], you must repeat the entire practical test.

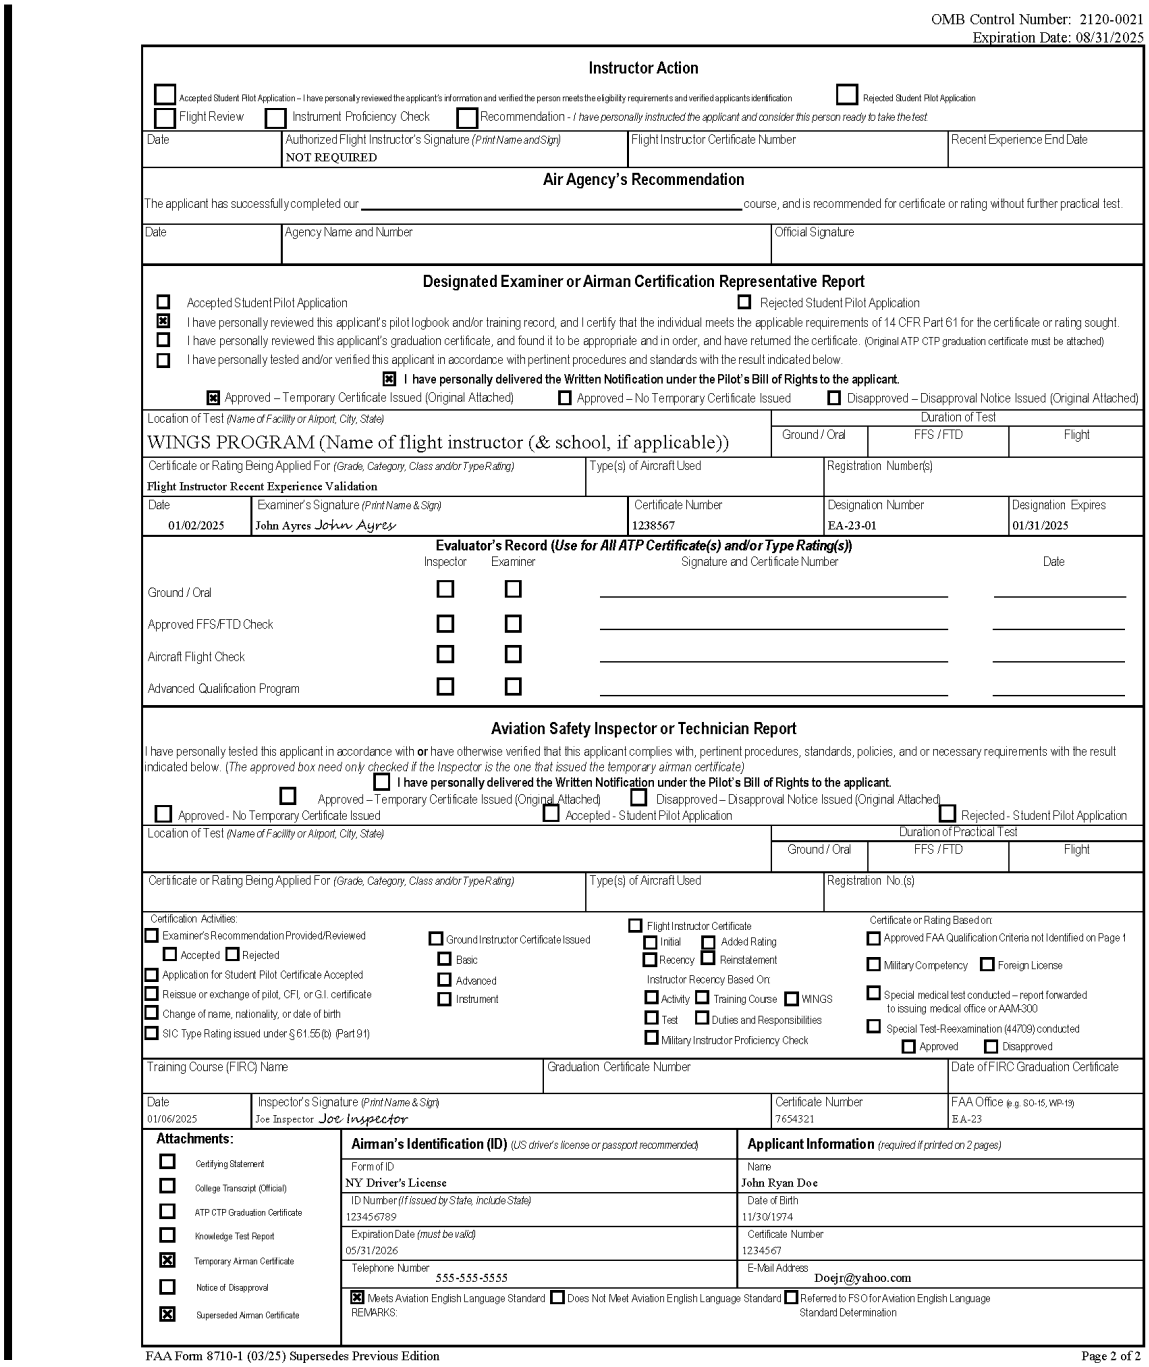

This letter does not extend the expiration date as shown on the knowledge test results, medical certificate, or required endorsements.

Sincerely,

[Signature of inspector conducting practical test]

Figure 5-240. Sample FAA Form 8710-1, Airman Certificate and/or Rating Application (Page 2) (For Flight Instructor Recent Experience Validation Based on WINGS Program Participation Completed by an FAA Designated Examiner)

NOTE: Flight instructors establishing recent experience or reinstating privileges for flight instructor certificates issued after December 1, 2024, will not require a Temporary Airman Certificate, except for recent experience or reinstatement based on a practical test for an additional flight instructor rating.
