VOLUME 5 AIRMAN CERTIFICATION

CHAPTER 2 TITLE 14 CFR PART 61 CERTIFICATION OF PILOTS AND FLIGHT INSTRUCTORS

Section 18 Conduct an Airline Transport Pilot Certification, Including Additional Category/Class Ratings

Source Basis:

- **Title 14 CFR § 61.1, Applicability and Definitions.**
- **Title 14 CFR § 61.23, Medical Certificates: Requirement and Duration.**
- **Title 14 CFR § 61.35, Knowledge Test: Prerequisites and Passing Grades.**
- **Title 14 CFR § 61.39, Prerequisites for Practical Tests.**
- **Title 14 CFR § 61.43, Practical Tests: General Procedures.**
- **Title 14 CFR § 61.45, Practical Tests: Required Aircraft and Equipment.**
- **Title 14 CFR § 61.51, Pilot Logbooks.**
- **Title 14 CFR § 61.64, Use of a Flight Simulator and Flight Training Device.**
- **Title 14 CFR § 61.71, Graduates of an Approved Training Program Other Than Under This Part: Special Rules.**
- **Title 14 CFR § 61.73, Military Pilots or Former Military Pilots: Special Rules.**
- **Title 14 CFR § 61.151, Applicability.**
- **Title 14 CFR § 61.153, Eligibility Requirements: General.**
- **Title 14 CFR § 61.155, Aeronautical Knowledge.**
- **Title 14 CFR § 61.156, Training Requirements: Airplane Category—Multiengine Class or Multiengine Airplane Type Rating Concurrently With an Airline Transport Pilot Certificate.**
- **Title 14 CFR § 61.157, Flight Proficiency.**
- **Title 14 CFR § 61.159, Aeronautical Experience: Airplane Category Rating.**
- **Title 14 CFR § 61.160, Aeronautical Experience—Airplane Category Restricted Privileges.**
- **Title 14 CFR § 61.161, Aeronautical Experience: Rotorcraft Category and Helicopter Class Rating.**
- **Title 14 CFR § 61.165, Additional Aircraft Category and Class Ratings.**
- **Title 14 CFR § 61.167, Airline Transport Pilot Privileges and Limitations.**
- **Title 14 CFR § 61.169, Letters of Authorization for Institutions of Higher Education.**
- **Title 14 CFR § 91.1053, Crewmember Experience.**
- **Title 14 CFR § 121.436, Pilot Qualification: Certificates and Experience Requirements.**
- **Title 14 CFR § 135.99, Composition of Flight Crew.**
- **Title 14 CFR § 135.243, Pilot in Command Qualifications.**

5-701 REPORTING SYSTEM(S). Use Safety Assurance System (SAS) Activity Recording (AR) and use the following activity codes, as applicable:

A. Original Certification.

- Oral: 1510.
- Simulator: 1511.
- Aircraft: 1512.

B. Additional Category or Class Rating: 1505.

5-702 OBJECTIVE. The objective of this task is to determine if an applicant meets the requirements for certification as an airline transport pilot (ATP) under Title 14 of the Code of Federal Regulations (14 CFR) part 61 subpart G. Completion of this task results in the issuance of Federal Aviation Administration (FAA) Form 8060-4, Temporary Airman Certificate, FAA Form 8060-5, Notice of Disapproval of Application, or a Letter of Discontinuance.

5-703 GENERAL. An applicant for an ATP Certificate must meet all applicable requirements of 14 CFR part 61 subpart G. With the exception of the powered-lift rating, a class rating is placed on the ATP Certificate. The following are the aircraft category and class ratings for the ATP Certificate:

A. Airplane Category: Class Ratings. The following class ratings are issued or added to an ATP Certificate with an airplane category:

- Single-Engine Land (SEL),
- Single-Engine Sea (SES),
- Airplane Multiengine Land (AMEL), and
- Airplane Multiengine Sea (AMES).

B. Rotorcraft Category: Class Ratings. An ATP Certificate with a rotorcraft category rating is issued only with the helicopter class rating.

NOTE: ATP Certificates are not issued with a gyroplane class rating. A gyroplane class rating may be added to an ATP Certificate, but only with recreational, private, or commercial pilot privileges.

C. Powered-Lift Category Rating. The powered-lift category rating is added to an ATP Certificate to read "POWERED-LIFT."

5-704 ELIGIBILITY—ATP CERTIFICATE—AIRPLANE, ROTORCRAFT, AND POWERED-LIFT. An applicant for an ATP Certificate must meet all applicable requirements of 14 CFR part 61 subpart G. For job aids, see Volume 5, Chapter 3, Section 1, Figure 5-109, ATP—Helicopter Applicant Qualifications Job Aid for Applicants Engaged in Operations Under 14 CFR Part 135 or 91K, and Figure 5-110, ATP—Airplane Multiengine Applicant Qualifications Job Aid for Applicants Engaged in Operations Under 14 CFR Part 121, 125, 135, or 91K.

A. Applicant Age Requirement (14 CFR § 61.153(a)(1) and (2)).

1) An applicant for an ATP Certificate must be at least 23 years of age.

2) An applicant for a restricted privileges ATP Certificate with an airplane category and multiengine class rating must be at least 21 years of age.

B. FAA Aviation English Language Standard (AELS) (14 CFR § 61.153(b)). An applicant must be able to read, speak, write, and understand the English language. Early in the process of issuing a certificate, the evaluator (e.g., aviation safety inspectors (ASI), aviation safety technicians (AST), or designated examiners) must determine that the applicant meets the FAA AELS. An applicant for an FAA certificate or rating must be able to communicate in English in a discernible and understandable manner with air traffic control (ATC), pilots, and others involved in preparing an aircraft for flight and operating an aircraft in flight. Volume 5, Chapter 14, Section 1 provides expanded guidance on how to determine English language abilities required for pilot certification. If there is any question as to whether the applicant can read, speak, write, or understand the English language, the evaluator must not issue the certificate and indicate this by checking the box "Referred to FSO for Aviation English Language Standard Determination" or "Does Not Meet Aviation English Language Standard" on page 2 of FAA Form 8710-1, Airman Certificate and/or Rating Application, or FAA Form 8400-3, Application for an Airman Certificate and/or Rating, as appropriate. If the certificate or rating being applied for requires a practical test, evaluators should consider the following:

1) If the applicant's ability to meet the FAA AELS is in question, the evaluator will not begin the practical test. In the case where an evaluator is not an ASI, the evaluator will check the box "Referred to FSO for Aviation English Language Standard Determination," located on the bottom of page 2 of the applicant's FAA Form 8710-1. The evaluator will refer the applicant to the responsible Flight Standards office. The evaluator will complete and submit the airman's application file through normal application procedures and notify the responsible Flight Standards office of the referral.

2) If the practical test has begun and the applicant's ability to meet the FAA AELS comes into question, the evaluator will discontinue the practical test and check the box "Referred to FSO for Aviation English Language Standard Determination" on the application. In addition, if the applicant's inability to meet the FAA AELS contributed to the failure of a task, the evaluator must note "Does Not Demonstrate FAA AELS" on FAA Form 8060-5. The evaluator will complete and submit the airman's application file through normal application procedures and notify the responsible Flight Standards office of the referral.

NOTE: Only FAA ASIs may check the box indicating "Does Not Meet Aviation English Language Standard" on page 2 of FAA Form 8710-1 or 8400-3. Other evaluators may only check the box indicating either "Meets Aviation English Language Standard" or "Referred to FSO for Aviation English Language Standard Determination."

C. Good Moral Character Requirement. An applicant must be of good moral character. The inspector or certifying official must ask an applicant if the applicant has been convicted of a felony. If the applicant's answer is affirmative, and the certification event is being conducted by a certifying official and not an inspector, the certifying official will refer the individual to the Flight Standards office where an inspector shall make further inquiry about the

nature and disposition of the conviction. If an inspector has reason to believe an applicant does not qualify for an ATP Certificate because of questionable moral character, the inspector must not conduct (or permit the certifying official to conduct) the practical test. Instead, the inspector will refer the matter to the immediate supervisor for resolution. The supervisor may need to consult with FAA Legal Counsel for a determination concerning whether the applicant meets the moral character eligibility requirement.

D. Acceptable Pilot Qualifications. An applicant must submit documentary evidence of at least one of the following pilot qualifications:

1) An FAA Commercial Pilot Certificate with an instrument rating;

2) Official U.S. military records as prescribed in 14 CFR § 61.73; or

3) A foreign commercial pilot license (CPL) with an instrument rating or a foreign ATP license with instrument privileges that was issued by an International Civil Aviation Organization (ICAO) country and a valid verification letter obtained from the Airmen Certification Branch (AFB-720).

E. ATP Certification Training Program (CTP) (14 CFR §§ 61.153(e) and 61.156).

1) The ATP CTP is required of applicants for an ATP Certificate with an airplane category, multiengine class rating or applicants for an ATP Certificate issued concurrently with a multiengine airplane type rating and is intended to prepare the applicant to operate safely in those operations that require an ATP Certificate by regulation. The ATP CTP is a prerequisite for the FAA's highest pilot certificate and includes training in:

- Aerodynamics,
- Automation,
- Adverse weather conditions,
- Air carrier operations,
- Transport airplane performance,
- Professionalism, and
- Leadership and development.

2) All persons applying for the multiengine airplane ATP knowledge test will be required to present a graduation certificate certifying the completion of an ATP CTP.

3) The ATP CTP completion certificate does not expire.

F. Knowledge Test (14 CFR §§ 61.35 and 61.39).

1) An ATP knowledge test report is valid for 60 calendar months when applying for an ATP Certificate with an airplane category and multiengine class rating. An ATP CTP graduation certificate must be presented to be eligible.

2) For an ATP Certificate with an airplane category and single-engine class rating, rotorcraft, or powered-lift category, a knowledge test report is valid for 24 calendar months.

3) An applicant for an ATP Certificate may take the practical test with an expired knowledge test, as provided for in 14 CFR § 61.39(b) and (c). See Volume 5, Chapter 3, Section 1 for additional information.

4) When applying for the ATP knowledge test per 14 CFR § 61.35(a)(3)(iii), the applicant must provide identification showing their date of birth as evidence that the applicant meets, or will meet, the age requirements for the certificate sought before the expiration date of the airman knowledge test report. Therefore, the minimum ages apply for the ATP knowledge test:

a) Except as provided for in subparagraph b) below, for issuance of any ATP Certificate, the applicant for the knowledge test must be 21 years of age.

b) An applicant seeking an ATP Certificate with an airplane category and multiengine class rating may apply for the ATP knowledge test at 18 years of age.

G. Medical Certificates. At the time of application for an ATP practical test, the applicant must hold at least a current third-class medical certificate if the practical test is conducted in an aircraft in flight. In accordance with 14 CFR § 61.23(b)(8), the applicant is not required to hold a medical certificate if the practical test is conducted entirely in a flight simulation training device (FSTD).

H. Title 14 CFR Part 135 Training and Qualification Records (14 CFR § 61.39(a)(3)). An applicant applying for the ATP practical test using flight time obtained under a 14 CFR part 135 Second in Command (SIC) Professional Development Program (SIC PDP), in accordance with 14 CFR § 61.159(c), must present a copy of the following:

1) Records required by 14 CFR § 135.63(a)(4)(vi):

- Date and result of each initial and recurrent oral or written test required by 14 CFR § 135.293(a) for each airplane type; and
- Date and result of each initial and recurrent competency check required by 14 CFR § 135.293(b) for each airplane type.

2) Records required by 14 CFR § 135.63(a)(4)(x). Date of completion of each initial and recurrent phase of training required by 14 CFR § 135.343 for each airplane type.

NOTE: For additional information about a 14 CFR part 135 SIC PDP, see Volume 3, Chapter 68.

5-705 REQUIREMENTS: AIRPLANE CATEGORY RATING.

A. ATP Certificate.

1) The holder of an ATP Certificate with an airplane category and multiengine class rating may serve in those operations that require an ATP Certificate by regulation, which are:

a) Pilot in command (PIC) of 14 CFR part 91 subpart K (part 91K) multiengine turbine-powered airplane operations (14 CFR § 91.1053);

b) PIC of 14 CFR part 121 operations (14 CFR § 121.436);

c) SIC of 14 CFR part 121 flag or supplemental operations that require three or more pilots (14 CFR § 121.436);

d) PIC of 14 CFR part 135 commuter operations using multiengine airplanes with nine or fewer passenger seats (scheduled 14 CFR part 135) (14 CFR § 135.243(a)(1));

e) PIC of 14 CFR part 135 on-demand operations using multiengine airplanes with 10 or more passenger seats (14 CFR § 135.243(a)(1));

f) Title 14 CFR part 135 on-demand passenger-carrying operations using turbojet airplanes (14 CFR § 135.243(a)(1)); and

g) PIC of a 14 CFR part 135 "eligible on-demand operation" using multiengine turbine-powered airplanes (14 CFR § 135.4).

2) An applicant for an ATP Certificate with an airplane category and a single-engine or multiengine class rating must meet the following minimum qualifications:

- Eligibility requirements listed in 14 CFR § 61.153;
- Aeronautical knowledge requirements listed in 14 CFR § 61.155; and
- Aeronautical experience requirements listed in 14 CFR § 61.159.

3) A person applying to add an airplane category and a single-engine or multiengine class rating to their ATP Certificate with another aircraft category rating (i.e., rotorcraft or powered-lift) must meet the minimum qualifications in 14 CFR § 61.165(b) or (c), as applicable.

4) A person applying to add a single-engine or multiengine class rating to their ATP Certificate with an airplane category rating must meet the minimum qualifications in 14 CFR § 61.165(e) or (f), as applicable.

B. Restricted Privileges ATP Certificate. A holder of a restricted privileges ATP Certificate may serve as a SIC in 14 CFR part 121 operations with the exception of flag or supplemental operations in 14 CFR part 121 requiring three or more pilots. All applicants for a restricted privileges ATP Certificate must be at least 21 years old and have a minimum of 200 hours of cross-country flight time. The following applicants are eligible for a restricted privileges ATP Certificate.

1) Military-Trained. In accordance with 14 CFR § 61.160(a), a U.S. military pilot or former U.S. military pilot, who has not been removed from flying status for lack of proficiency or because of a disciplinary action involving aircraft operations, may apply for an ATP Certificate with an airplane category and multiengine class rating or an ATP Certificate concurrently with an airplane type rating with a minimum of 750 hours of total time as a pilot, if the pilot presents:

a) Eligibility requirements listed in 14 CFR § 61.153;

b) Aeronautical knowledge requirements listed in 14 CFR § 61.155;

c) Aeronautical experience requirements listed in 14 CFR § 61.160;

d) An official DD Form 214, Certificate of Release or Discharge from Active Duty, indicating that the person was honorably discharged from the U.S. Armed Forces, or an official U.S. Armed Forces record that shows the pilot is currently serving in the U.S. Armed Forces; and

e) An official U.S. Armed Forces record that shows the person graduated from a U.S. Armed Forces undergraduate pilot training school and received a rating qualification as a military pilot.

2) Graduates of a Bachelor's Degree Program With an Aviation Major. In accordance with 14 CFR § 61.160(b) or (d), a graduate with a bachelor's degree in an aviation major received from an institution of higher education, as defined in 14 CFR § 61.1, that has been issued a Letter of Authorization (LOA) by the General Aviation and Commercial Division (AFS-800) (refer to the current edition of Advisory Circular (AC) 61-139, Institution of Higher Education's Application for Authority to Certify its Graduates for an Airline Transport Pilot Certificate with Reduced Aeronautical Experience) under 14 CFR § 61.169 is eligible to apply for a restricted privileges ATP Certificate with an airplane category and multiengine class rating, or an ATP Certificate concurrently with an airplane type rating with the following minimum qualifications:

a) Eligibility requirements listed in 14 CFR § 61.153;

b) Aeronautical knowledge requirements listed in 14 CFR § 61.155;

c) The graduate satisfies the applicable aeronautical experience requirements listed in 14 CFR § 61.160; and

d) The applicant presents at the time of application an official transcript or other document acceptable to the Administrator from the institution of higher education certifying the graduate has met the requirements in 14 CFR § 61.160(b) or (d). The specific certifying statement an institution of higher education will use is listed in the LOA issued. The following is an example of a statement that may be used:

> "The [insert institution's name] certifies that the recipient of this degree has successfully completed all of the aviation coursework requirements of 14 CFR § 61.160[(b) or (d)] and therefore meets the academic eligibility requirements of 14 CFR § 61.160[(b) or (d)]."
>
> NOTE: If the applicant is qualifying under 14 CFR § 61.160(b), the minimum total time as a pilot is 1,000 hours. If the applicant is qualifying under 14 CFR § 61.160(d), the minimum total time as a pilot is 1,250 hours.

3) Graduates of an Associate's Degree Program With an Aviation Major. In accordance with 14 CFR § 61.160(c), a graduate with an associate's degree in an aviation major received from an institution of higher education, as defined in 14 CFR § 61.1, that has been issued an LOA by AFS-800 (refer to AC 61-139) under 14 CFR § 61.169 is eligible to apply for a restricted privileges ATP Certificate with an airplane category and multiengine class rating, or an ATP Certificate concurrently with an airplane type rating with the following minimum qualifications:

a) Eligibility requirements listed in 14 CFR § 61.153;

b) Aeronautical knowledge requirements listed in 14 CFR § 61.155;

c) The graduate satisfies the applicable aeronautical experience requirements listed in 14 CFR § 61.160; and

d) The applicant presents at the time of application an official transcript or other document acceptable to the Administrator from the institution of higher education certifying the graduate has met the requirements in 14 CFR § 61.160(c)(1)–(3). The specific certifying statement an institution of higher education must use will be listed in the LOA issued. The following is an example of a statement that may be used:

> "The [insert institution's name] certifies that the recipient of this degree has successfully completed all of the aviation coursework requirements of 14 CFR § 61.160(c) and therefore meets the academic eligibility requirements of 14 CFR § 61.160(c)."
>
> NOTE: If the applicant is qualifying under 14 CFR § 61.160(c), the minimum total time as a pilot is 1,250 hours.

4) Pilots With 1,500 Hours Total Time. In accordance with 14 CFR § 61.160(f), a person who has 1,500 hours total time as a pilot is eligible to apply for a restricted privileges ATP Certificate with an airplane category and multiengine class rating, or an ATP Certificate concurrently with an airplane type rating with the following minimum qualifications:

- Eligibility requirements listed in 14 CFR § 61.153;
- Aeronautical knowledge requirements listed in 14 CFR § 61.155; and
- Aeronautical experience requirements listed in 14 CFR § 61.159, except the person is required to have only 200 hours of cross-country flight time.

5) Limitations. The holder of a restricted privileges ATP Certificate may not serve as a PIC in any operation where an ATP Certificate is required by regulation or serve as a SIC in 14 CFR part 121 flag or supplemental operations that require three or more pilots (14 CFR § 61.167(b)).

a) The following limitation must be placed on the certificate: "RESTRICTED IN ACCORDANCE WITH 14 CFR § 61.167."

b) With the exception of a restricted privileges ATP Certificate issued in accordance with 14 CFR § 61.160(f), the following limitation must also be placed on the

certificate: “HOLDER DOES NOT MEET THE PILOT IN COMMAND AERONAUTICAL EXPERIENCE REQUIREMENTS OF ICAO.”

6) Removal of Limitations From an ATP Certificate. See subparagraph 5-713K2) below.

5-706 REQUIREMENTS: ROTORCRAFT CATEGORY AND HELICOPTER CLASS RATING. The holder of an ATP Certificate with a helicopter class rating may serve in those operations that require an ATP Certificate by regulation, as defined in 14 CFR § 135.243.

A. Original Issuance ATP Certificate. An applicant for an ATP Certificate with a rotorcraft category and helicopter class rating must meet the following minimum qualifications:

- Eligibility requirements listed in 14 CFR § 61.153;
- Aeronautical knowledge requirements listed in 14 CFR § 61.155; and
- Aeronautical experience requirements listed in 14 CFR § 61.161.

B. Additional Category and Class Rating. A person applying to add a rotorcraft category and helicopter class rating to their ATP Certificate with another aircraft category rating (i.e., airplane or powered-lift) must meet the minimum qualifications in 14 CFR § 61.165(a).

5-707 AERONAUTICAL EXPERIENCE REQUIREMENTS FOR A POWERED-LIFT RATING.

A. Original Issuance ATP Certificate. An applicant for an ATP Certificate with a powered-lift rating must meet the following minimum qualifications:

- Eligibility requirements listed in 14 CFR § 61.153;
- Aeronautical knowledge requirements listed in 14 CFR § 61.155; and
- Aeronautical experience requirements listed in 14 CFR § 61.163.

B. Additional Category Rating. A person applying to add a powered-lift category to their ATP Certificate with another aircraft category rating (i.e., airplane or rotorcraft) must meet the minimum qualifications in 14 CFR § 61.165(d).

5-708 VALIDATION OF AERONAUTICAL EXPERIENCE.

A. Pilot Logbooks/Records. The applicant must present pilot logbooks and/or reliable records that show that the applicant meets at least the appropriate aeronautical experience to apply for the ATP Certificate. Official military flight time records may be used if the records meet the criteria of 14 CFR § 61.73(h) and the inspector can determine if the applicant’s flight time meets or exceeds the minimum aeronautical experience requirements of 14 CFR part 61 subpart G. However, the aeronautical experience shown in official military records may not always align with the required aeronautical experience requirements in 14 CFR part 61. In such circumstances, an inspector who has past military flight experience as a military pilot, or knowledge of military records, may assist in the validation of the flight records. A designee should contact their Principal Operations Inspector (POI) if there are questions about the

documentation presented by the applicant. See Volume 5, Chapter 2, Section 15 for additional information and examples of military records.

B. SIC Time. The logging of SIC flight time is prescribed in 14 CFR § 61.51(f). The use of SIC time towards the aeronautical experience requirements for an ATP Certificate depends on the circumstances under which the SIC time was logged.

1) SIC Time Logged Under 14 CFR § 61.51(f)(1). SIC time logged in accordance with 14 CFR § 61.51(f)(1) may be used to meet the aeronautical experience requirements for an ATP Certificate without restriction. To log time under 14 CFR § 61.51(f)(1), the SIC must meet the requirements of 14 CFR § 61.55 and occupy a pilot seat in an aircraft that requires more than one pilot by the aircraft Type Certificate Data Sheet (TCDS).

2) SIC Time Logged Under 14 CFR § 61.51(f)(2). SIC time logged in accordance with 14 CFR § 61.51(f)(2) may be used to meet the aeronautical experience requirements for an ATP Certificate without restriction. To log time under 14 CFR § 61.51(f)(2), the SIC must hold the appropriate category, class, and instrument rating (if required for the flight) for the aircraft being flown and more than one pilot must be required by the aircraft TCDS or by the regulations under which the flight is being conducted. For example, in accordance with 14 CFR § 135.99(b), a 14 CFR part 135 air carrier may not conduct operations in an aircraft with 10 or more seats without an SIC. Therefore, an SIC serving in that kind of operation may log SIC time in accordance with 14 CFR § 61.51(f)(2).

3) SIC Time Logged Under 14 CFR § 61.51(f)(3). SIC time logged in accordance with 14 CFR § 61.51(f)(3) may be used to meet certain aeronautical experience requirements for an ATP Certificate. To log time under 14 CFR § 61.51(f)(3), the requirements of 14 CFR § 61.159(c) must be met and the SIC must be serving in an operation conducted in an airplane for which two pilots are not required by the aircraft TCDS or the regulations under which the flight is being conducted. In accordance with 14 CFR § 61.159(e), § 61.160(h), or § 61.161(d), as applicable, an applicant who uses flight time logged in accordance with 14 CFR § 61.159(c) to meet the aeronautical experience requirements for an ATP Certificate must be issued the limitation, "HOLDER DOES NOT MEET THE PILOT IN COMMAND AERONAUTICAL EXPERIENCE REQUIREMENTS OF ICAO," on their ATP Certificate. See Volume 3, Chapter 68, Section 1 for additional information regarding aeronautical experience accrued in a 14 CFR part 135 SIC PDP.

4) SIC Time Logged Under 14 CFR § 61.51(f)(4). Flight time logged while operating as an SIC under public aircraft operations (PAO) can be used to meet ATP aeronautical experience requirements with certain limitations in accordance with 14 CFR § 61.51(f)(4). Title 14 CFR § 61.51(f)(4) defines the types of aircraft in which a person may log SIC time during PAO: large aircraft, turbojet-powered airplanes, or aircraft that hold or originally held a type certificate (TC) that requires a second pilot. However, for time logged in aircraft that are not type certificated for two pilots, a limitation must be added to the ATP Certificate that states, "HOLDER DOES NOT MEET THE PILOT IN COMMAND AERONAUTICAL EXPERIENCE REQUIREMENTS OF ICAO," in accordance with 14 CFR § 61.51(f)(4)(ii), § 61.159(e), or § 61.161(d), as appropriate.

NOTE: ICAO Annex 1, Personnel Licensing, paragraph 2.1.9.3 states, "[t]he holder of a pilot license, when acting as co-pilot at a pilot station of an aircraft certificated to be operated with a co-pilot, shall be entitled to be credited in full with this flight time towards the total flight time required for a higher grade of pilot licence." For this reason, the limitation must not be added if the time was logged in an aircraft that is type certificated for two pilots.

C. Approved Pilot School or Training Center Graduate. The requirements for persons who graduate from an approved training program under 14 CFR part 141 or 142 are prescribed in 14 CFR § 61.71(a).

5-709 INSTRUCTOR ENDORSEMENTS AND RECOMMENDATION.

A. Flight Instructor Endorsement. An applicant for a type rating to be added to an existing ATP Certificate, or a type rating to be concurrently completed with an ATP Certificate, must have an endorsement in their logbook or training record from an authorized instructor certifying satisfactory completion of the training in the areas of operation required by 14 CFR § 61.157(e). However, in accordance with 14 CFR § 61.157(c), a logbook endorsement is not required for pilots employed by a certificate holder (CH) operating under 14 CFR part 121 or 135, if the applicant presents a training record that shows completion of the CH's approved 14 CFR part 121 or 135 training program. The flight training required by 14 CFR § 61.157(b) must be conducted by an authorized instructor. Authorized instructors include the following:

1) Certified flight instructors qualified in accordance with 14 CFR § 61.195.

2) Title 14 CFR part 142 flight instructors qualified in accordance with 14 CFR § 142.47.

3) Title 14 CFR part 121 flight instructors qualified in accordance with 14 CFR § 121.412.

4) Title 14 CFR part 135 flight instructors qualified in accordance with 14 CFR § 135.338.

5) Title 14 CFR part 91K flight instructors qualified in accordance with 14 CFR § 91.1091.

6) The holder of an ATP Certificate with the appropriate category, class, and type, if applicable, in accordance with 14 CFR § 61.167.

NOTE: The holder of a restricted privileges ATP Certificate may not provide this training.

B. Credit for Flight Training. Under the provisions of 14 CFR § 61.41, the flight training toward the requirements of a pilot certificate or rating may be credited if the training was received outside of the United States from:

1) A flight instructor of the United States or an ICAO contracting State's Armed Forces in a program for training military pilots; or

2) A flight instructor who is authorized to give such training by the licensing authority of a foreign contracting State to ICAO.

NOTE: An endorsement for a practical test may only be given by an authorized FAA-certificated flight instructor or by the holder of an ATP Certificate as described in subparagraph A above.

C. Instructor Action. The "Instructor Action" section on FAA Form 8710-1 does not need to be signed for the original issuance of an ATP Certificate, unless the applicant previously failed a practical test for the rating being tested. (Refer to 14 CFR § 61.49(a).)

NOTE: An applicant who fails a practical test may reapply after receiving the necessary training and logbook endorsement from an authorized instructor. (See subparagraph A above for a list of authorized instructors.)

D. Evaluator's Record. The "Evaluator's Record" for ATP certification and/or type ratings section of FAA Form 8710-1 must be signed and dated by the inspector or certifying official on the appropriate lines for each test segment conducted. See Volume 5, Chapter 1, Section 3 for additional special emphasis items on page 2 of FAA Form 8710-1 that may be applicable to ATP certification.

5-710 PILOT CERTIFICATE LEVEL AND CATEGORY AND CLASS RATING. The following category and class rating(s) for which the applicant has qualified on the original or subsequent ATP practical tests are entered on the ATP Certificate.

A. Addition of Lighter-Than-Air (LTA) and Glider Class Ratings. An LTA or glider category rating may be added to an existing ATP Certificate; however, the rating may be added only at the sport, recreational, private, or commercial pilot certificate level, as appropriate to the practical test completed. There is no provision for the original issuance of an ATP Certificate with an LTA or glider category rating.

B. Upgrading Type Ratings. Type rating tests are conducted to the ATP standard for all grades of pilot certificate. Therefore, all type ratings in that category and class of aircraft for which the ATP practical test is conducted in are upgraded after successful completion of the practical test. For example, a person who holds B737, DC-3, and SK-62 type ratings on their Commercial Pilot Certificate, and later satisfactorily completes an ATP practical test in a CE-750, would have their B737 and DC-3 type ratings elevated up to the ATP Certificate. The SK-62 would not elevate up because the practical test was in a multiengine airplane. However, when the person satisfactorily completes an ATP practical test in a helicopter, the SK-62 would then elevate up to the ATP Certificate. Therefore, all of the type ratings held on the superseded certificate carry forward at the new certificate level within category and class.

1) Except for type ratings and, under some circumstances, the instrument rating, other ratings indicated on the superseded pilot certificate are carried forward at the commercial, private, recreational, or sport pilot certificate level, as indicated on the superseded certificate.

2) Instrument rating privileges are shown on the ATP Certificate only if the ATP practical test was conducted under visual flight rules (VFR) only, or to retain instrument privileges that were held on the superseded certificate for a category of aircraft other than the one used for the ATP practical test.

C. Aircraft Limited to VFR. There is no provision for taking an initial practical test for an ATP Certificate in an aircraft that would require a VFR limitation.

5-711 PREREQUISITES AND COORDINATION REQUIREMENTS.

A. Prerequisites. This task requires knowledge of the regulatory requirements of 14 CFR part 61 and FAA policies, and qualification as an Operations ASI or as an appropriately rated designee.

B. Coordination. For inspectors, this task may require coordination with the airworthiness unit and AFB-720. For designees, this task may require coordination with their POI.

5-712 REFERENCES, FORMS, AND JOB AIDS.

A. References (current editions):

- Title 14 CFR Parts 61, 91, 141, 142, and 187 Appendix A.
- Airline Transport Pilot and Type Rating for Airplane Category Airman Certification Standards.
- Airline Transport Pilot and Aircraft Type Rating Practical Test Standards for Rotorcraft Category Helicopter Rating.

B. Forms:

- FAA Form 8060-4, Temporary Airman Certificate.
- FAA Form 8060-5, Notice of Disapproval of Application.
- FAA Form 8710-1, Airman Certificate and/or Rating Application.

C. Job Aids. Figure 5-84, ATP—Airplane Multiengine Applicant Qualifications Job Aid for Applicants Engaged in Operations Under 14 CFR Part 61 or 141.

5-713 PROCEDURES.

A. Schedule Appointment. The applicant must bring the following documents to the appointment:

- A completed application for the certificate or rating using the Integrated Airman Certification and Rating Application (IACRA) (see Volume 5, Chapter 2, Section 4). In lieu of completing a form using IACRA, an applicant may provide an FAA Form 8710-1 correctly completed, in ink or typed (see Volume 5, Chapter 1, Section 3);

- At least a Commercial Pilot Certificate and an instrument rating, or as permitted by 14 CFR § 61.153(d)(2) or (3);
- At least a current third-class medical certificate, FAA Form 8500-9, Medical Certificate ____ Class (if required);
- An FAA-approved ATP CTP graduation certificate (if applicable);
- A knowledge test report (if applicable);
- An FAA-approved pilot school or training center graduation certificate, if applicable (see Volume 5, Chapter 1, Section 3, subparagraph 5-53C3)b));
- An official transcript and a certifying statement from an institution of higher education listed on the transcript or other acceptable document (if applicable);
- A personal logbook or other records substantiating the flight experience shown on the application form;
- The aircraft maintenance records;
- The aircraft Airworthiness Certificate;
- The aircraft registration;
- The Federal Communications Commission (FCC) aircraft station license (if applicable); and
- An acceptable form of photo identification.

B. Applicant Arrives for Appointment. Collect and review the documents and records listed above in subparagraph A above.

C. Review Application. Verify that the information on the application (i.e., FAA Form 8710-1) is presented accurately and completely in accordance with the form instructions and the guidance material in Volume 5, Chapter 1, Section 3.

1) In Section I, ensure that the applicant has marked "ATP" or "ATP-Restricted." If the applicant is seeking an additional aircraft rating, ensure that the applicant has checked "Added Rating."

NOTE: If the applicant has marked "ATP-Restricted" and has met the requirements of 14 CFR § 61.160(b), (c), or (d), the inspector or designee must ensure that the institution of higher education is listed in the "Remarks" section from which the authorizing statement was issued.

2) If this is a retest, ensure that an instructor has signed the "Instructor Action" section of FAA Form 8710-1.

D. Verify Applicant's Identity. Inspect acceptable forms of identification to establish the applicant's identity in accordance with the procedures described in Volume 5, Chapter 1, Section 3.

1) Compare the identification with the personal information provided on FAA Form 8710-1.

2) When the applicant's identity is verified, continue.

3) If the applicant's identity cannot be verified because of lack of identification or inadequate identification, explain what types of identification are acceptable. Advise the applicant to return with appropriate identification.

4) If the applicant's identity appears to be different from the information supplied on FAA Form 8710-1, or it appears that an attempt at falsification has been made, discontinue the practical test. Inspectors should see Volume 5, Chapter 1, Section 9 for additional information. Designees should contact their POI for further assistance.

E. Establish Eligibility. Determine if the applicant meets the specific eligibility, aeronautical knowledge, aeronautical experience, and aeronautical skill requirements for certification as an ATP (14 CFR part 61 subpart G, as appropriate).

1) Determine that the applicant meets the applicable eligibility and aeronautical experience requirements (see Figure 5-84 for ATP applicants for airplane category and multiengine class rating).

2) Determine if an applicant for an additional rating holds the required ATP Certificate.

3) If the applicant's medical certificate and Statement of Demonstrated Ability (SODA), if any, state any limitation that would make a special medical flight test necessary, see Volume 5, Chapter 8.

4) If the applicant is applying for a test on the basis of graduation from an approved pilot school or training center, inspect the applicant's pilot school graduation certificate or copies of the 14 CFR part 142 training center records to verify that the applicant meets the requirements of 14 CFR § 61.71. See Volume 5, Chapter 1, Section 3, subparagraph 5-53C3)b) for additional information on graduation certificate criteria.

5) Review the applicant's logbook or other records to determine if an ICAO limitation will be necessary at the satisfactory completion of the practical test. Ensure that the record of flight time in Section III of the application reflects the appropriate flight times.

> NOTE: If an applicant is using SIC time to meet the aeronautical experience requirements for the ATP, inspectors must ask the applicant if any of that time was logged during PAO (public aircraft are defined in Title 49 of the United States Code (49 U.S.C.) § 40102(a)(41)). If the answer is yes, the inspector must then determine whether a limitation must be added to the ATP certificate. See subparagraph 5-708B4 above and refer to 14 CFR § 61.51(f)(4) for additional information.

6) If an applicant is found not possessing the required aeronautical experience, return to the applicant all documents presented in subparagraph A above. Inform the applicant that they do not qualify to take the ATP practical test.

7) In accordance with 14 CFR § 61.39(f), if the oral, FSTD, and/or flight portions of the test are not completed on the same date, then all remaining portions must be completed

within 2 calendar months after the month the applicant began the test. In accordance with 14 CFR § 61.39(g), if all remaining portions are not completed within 2 calendar months after the month the applicant began the test, then the applicant must retake the entire practical test.

8) In accordance with 14 CFR § 61.43(e) and (f), if a practical test is discontinued due to unsatisfactory performance, inclement weather, aircraft airworthiness, or other safety-of-flight concern, the applicant may receive credit for those areas of operations that were passed if the following requirements are met.

a) If discontinued due to unsatisfactory performance, the applicant must:

- Satisfactorily accomplish additional training and obtain the appropriate instructor endorsements;
- Present the Notice of Disapproval of Application to the examiner or ASI; and
- Pass the remainder of the practical test within 60 calendar days after the date the practical test was discontinued.

b) If discontinued due to inclement weather, aircraft airworthiness, or other safety-of-flight concern, the applicant must:

- Present the Letter of Discontinuance to the examiner or ASI; and
- Pass the remainder of the practical test within 60 calendar days after the date the practical test was discontinued.

9) Examine the applicant's knowledge test report or the test report from an approved school with knowledge test examining authority, if applicable.

a) If the applicant is an employee of a 14 CFR part 119 CH conducting operations under 14 CFR part 121, 125, or 135, or a military pilot meeting the applicable criteria, the expiration date of the knowledge test may be extended per 14 CFR § 61.39.

b) Inspect the applicant's letter prepared on the appropriate airline letterhead stationery, certifying the dates of the applicant's employment and eligibility under 14 CFR § 61.39 or military documentation showing qualification under 14 CFR § 61.39(b).

F. Requirements for an Additional Category or Class Rating.

1) For an additional category rating, the applicant must present a logbook or other records showing that the applicant has met the applicable requirements of 14 CFR § 61.165. A knowledge test is required for an additional category rating. Additionally, applicants adding an airplane category and multiengine class rating to any other ATP Certificate must have completed the ATP CTP.

2) For an additional class rating, the applicant must present a logbook or other records showing the applicant has met the applicable requirements of 14 CFR § 61.165. Applicants adding a multiengine class rating to an ATP Certificate with an airplane category rating must have completed the ATP CTP and the applicable knowledge test.

G. Aircraft Requirements. Review the applicant's aircraft maintenance records, logbooks, Airworthiness Certificate, and aircraft registration to determine if the aircraft is airworthy and suitable for this practical test. After review, return the documents to the applicant. Inspectors may coordinate with an Airworthiness inspector for this review.

H. Discrepancies. If a discrepancy that cannot be immediately corrected exists in any of the documents, return the application and all documents to the applicant. Inform the applicant of the reasons for ineligibility and explain how the applicant may correct the discrepancies.

I. Conduct the Practical Test. After determining that the applicant is eligible and meets all prerequisites for the certificate and/or rating sought, accept the application and conduct the practical test in accordance with the current Airman Certification Standards (ACS) or practical test standards (PTS), as applicable. (If a type rating is sought, see Volume 5, Chapter 2, Section 19.)

1) Title 14 CFR § 61.157(j) permits inspectors to waive any tasks for which the Administrator has given approval for waiver.

a) For ATP practical tests conducted in accordance with 14 CFR § 61.157(f)(1)(i) by completion of a 14 CFR § 121.441 proficiency check, see Volume 3, Chapter 19, Section 7 for policy and information regarding waiving of tasks.

b) For ATP practical tests conducted in accordance with 14 CFR § 61.157(f)(1)(ii) by completion of both a competency check under 14 CFR § 135.293(a)(2) and (b) and a PIC instrument proficiency check (IPC) under 14 CFR § 135.297, the pilot is required to complete only the types of instrument approaches that the pilot will be authorized to use as listed in the CH's operations specifications (OpSpecs). Therefore, if a CH is not authorized to perform a type of approach, that type of approach may be waived for pilots of that CH. (Refer to the Legal Interpretation of 14 C.F.R. §§ 135.293(b) and 135.297(c) to Steve Kane, August 11, 2011.)

NOTE: Some 14 CFR part 121 air carriers and 14 CFR part 135 air carriers/operators are not authorized to perform circling approaches below conditions of less than a 1,000 foot ceiling and 3 statute miles (sm) visibility. Therefore, pilots completing an ATP practical test in accordance with 14 CFR § 61.157(f)(1)(i) or (ii) are not required to complete the circling approach and landing tasks. However, these pilots must have the appropriate limitation added to their certificate. Refer to Airline Transport Pilot and Type Rating for Airplane Category Airman Certification Standards, Appendix 1, Practical Test Roles, Responsibilities, and Outcomes, for additional information.

c) For ATP practical tests conducted in accordance with 14 CFR § 61.157(f)(1)(iii) by completion of both a competency check under 14 CFR § 91.1065 and a PIC IPC under 14 CFR § 91.1069, the pilot is required to complete only the types of instrument approaches that the pilot will be authorized to use as listed in the program manager's management specifications (MSpecs). Therefore, if a program manager is not authorized to

perform a type of approach, that type of approach may be waived for pilots of that program manager.

d) For all other ATP practical tests for a new category or class rating, waiver authority does not apply; no tasks may be waived.

NOTE: In accordance with 14 CFR § 61.45(b), an aircraft used for the practical test must have the necessary equipment for each required area of operation and must not have operating limitations that prohibit use of the aircraft in any of the required areas of operation. Therefore, if an applicant for a new category or class rating uses an aircraft that is not capable of all required tasks, the applicant must provide a separate aircraft to complete the remaining tasks.

2) If the practical test is not completed for reasons other than unsatisfactory performance, issue a Letter of Discontinuance to the applicant (see Volume 5, Chapter 1, Section 3, Figure 5-4, Sample Letter of Discontinuance).

a) Return the application and all submitted documents to the applicant with the original of the Letter of Discontinuance.

b) Explain how the applicant may complete the test at a later date and reschedule the test, if requested to do so.

c) Close the SAS AR record (inspectors only).

J. Unsatisfactory Performance. If the applicant did not meet the applicable standards for the certificate sought, inform the applicant of the reasons for the unsatisfactory performance. Prepare a Notice of Disapproval of Application using IACRA. If IACRA is not used, prepare a Notice of Disapproval of Application in accordance with the guidance in Volume 5, Chapter 1, Section 6.

K. Satisfactory Performance. When the applicant has satisfactorily met all requirements for the certificate and/or rating sought, prepare a Temporary Airman Certificate using IACRA. If IACRA is not used, prepare a Temporary Airman Certificate in accordance with the guidance in Volume 5, Chapter 1, Section 5.

1) Enter Limitations. Enter the correct limitation(s). The limitations listed below may be issued simultaneously and/or in conjunction with operational restrictions.

a) Enter "RESTRICTED IN ACCORDANCE WITH 14 CFR 61.167" if the applicant has not satisfied the age requirement of 14 CFR § 61.153(a)(1) and the aeronautical experience requirements of 14 CFR § 61.159. (Refer to 14 CFR § 61.160(g).)

b) Enter "HOLDER DOES NOT MEET THE PILOT IN COMMAND AERONAUTICAL EXPERIENCE REQUIREMENTS OF ICAO" if the applicant applied for a restricted privileges ATP Certificate in accordance with 14 CFR § 61.160(a), (b), (c), or (d). (Refer to 14 CFR § 61.160(h).)

c) Enter "HOLDER DOES NOT MEET THE PILOT IN COMMAND AERONAUTICAL EXPERIENCE REQUIREMENTS OF ICAO" if the applicant used flight time logged in accordance with 14 CFR § 61.51(f)(4) or § 61.159(b), (c), or (d) to meet the aeronautical experience requirements for an ATP Certificate. (Refer to 14 CFR § 61.51(f)(4)(ii), § 61.159(e), § 61.160(h), or § 61.161(d), as applicable.)

2) Removal of Limitations From an ATP Certificate. An inspector or an authorized designee with ATP Certificate authority may remove the limitations described previously that are placed on the ATP Certificate. Except as described for certain designees below, the applicant only needs to present satisfactory evidence that they have met the age requirement in 14 CFR § 61.153(a)(1) and the aeronautical experience requirements in 14 CFR § 61.159 or § 61.161, as applicable (refer to 14 CFR §§ 61.159(f), 61.160(g) and (h), and 61.161(e)). The applicant must complete Section III, Record of Pilot Time, on FAA Form 8710-1 to be issued an unrestricted ATP Certificate.

a) Designee Functions. Available designee functions include the following:

1. Removal of the limitation, "HOLDER DOES NOT MEET THE PILOT IN COMMAND AERONAUTICAL EXPERIENCE REQUIREMENTS OF ICAO," as required by 14 CFR § 61.51(f)(4)(ii), § 61.159(e), § 61.160(h), or § 61.161(d). The applicant must present satisfactory evidence of having met the aeronautical experience requirements of ICAO. To meet the aeronautical experience requirements of ICAO, an applicant must meet the aeronautical experience requirements of 14 CFR § 61.159(a) or § 61.161(a), as applicable, without the use of flight time obtained as an SIC under PAO in an aircraft not type certificated for two pilots (14 CFR § 61.51(f)(4)), SIC under an SIC PDP (14 CFR § 61.159(c)), or flight time obtained as a flight engineer (FE) (14 CFR § 61.159(d)), or without using the night flight time credit for night takeoffs and landings to a full stop (14 CFR § 61.159(b)).

2. Removal of the limitation, "RESTRICTED IN ACCORDANCE WITH 14 CFR 61.167," as required by 14 CFR § 61.160(g).

NOTE: For removal of the limitation required by 14 CFR § 61.64(f)(2), see Volume 5, Chapter 2, Section 5, paragraph 5-324.

b) Designee Requirements. The qualification and training requirements for each type of designee authorized (e.g., Designated Pilot Examiner (DPE), Training Center Evaluator (TCE), or Aircrew Program Designee (APD)) to remove these limitations vary. See FAA Order 8000.95, Designee Management Policy (as amended).

1. In order to remove a restriction from an ATP Certificate, the designee must be authorized to issue an ATP Certificate and must have received training on evaluating applicants to determine eligibility for removal of an ATP limitation. For example, for a designee to be eligible to remove a limitation from an ATP Certificate in the airplane category with a Multiengine Land (MEL) rating, the designee must be authorized to issue an ATP Certificate in the airplane category with an MEL rating, and have received training on determining eligibility and the process for removal of the limitation.

2. A DPE authorized to issue an ATP Certificate in the airplane category with a multiengine class rating may remove the limitations by verifying the pilot meets the minimum age and aeronautical experience requirements as described following the process in subparagraph K2) above.

3. A TCE may only remove limitations as authorized in curricula approved by the Training Center Program Manager (TCPM) in accordance with 14 CFR part 142. A TCE is not authorized to remove an ATP limitation based solely on satisfactory presentation of evidence from the airman.

4. An APD may only remove limitations as authorized in the 14 CFR part 121 or 135 training and qualification program, as approved by the POI. An APD is not authorized to remove an ATP limitation based solely on satisfactory presentation of evidence from the airman.

NOTE: For the removal of a limitation that is an administrative action only (e.g., 14 CFR § 61.64(f)(2) or § 61.160(g) or (h)), the TCE or APD is not required to conduct an evaluation of the pilot. However, removal of the limitation must be part of an approved curriculum, and the CH must have approved procedures that allow the TCE or APD to verify the pilot has satisfactorily completed the approved curriculum and is eligible to have the limitation removed.

3) Issued in a Foreign Country. If the pilot certificate is issued in a foreign country, refer to 14 CFR § 61.13(a), part 187 appendix A, and the current edition of AC 187-1, Flight Standards Service Schedule of Charges Outside the United States (for inspectors only).

L. Certification File. Complete the certification file.

1) Ensure that both the "Evaluator's Record" and either the "Aviation Safety Inspector or Technician Report" or "Designated Examiner or Airman Certification Representative Report" sections (as appropriate) of FAA Form 8710-1 are completed.

2) If the applicant qualified for the ATP practical test on the basis of military competence or a foreign pilot license and did not have a U.S. Commercial Pilot Certificate, ensure that block A and block B or D, as appropriate, of Section II of FAA Form 8710-1 are completed correctly to indicate why a Commercial Pilot Certificate is not attached to the file.

3) If not using IACRA, forward the completed certification file to AFB-720 or to the Flight Standards (FS) office (as appropriate).

4) Return all other submitted documentation to the applicant. Do not punch a hole in the holographic image in the bottom right-hand corner of the submitted pilot certificate if the practical test was discontinued for unsatisfactory performance or when a Letter of Discontinuance has been issued.

5) Close the SAS AR record (inspectors only).

5-714 TASK OUTCOMES. Completion of this task results in the issuance of one of the following:

- Temporary Airman Certificate;
- Notice of Disapproval of Application; or
- Letter of Discontinuance.

5-715 FUTURE ACTIVITIES. The applicant may return for removal of a restriction, limitation, or for an added category, class, or type rating.

Figure 5-84. ATP—Airplane Multiengine Applicant Qualifications Job Aid for Applicants Engaged in Operations Under 14 CFR Part 61 or 141

APPLICANT NAME:	DATE:

I. General Eligibility	
A. Applicant Age 14 CFR § 61.153(a)(1) and (2)	
1. At least 23 years old for an Airline Transport Pilot (ATP) Certificate (II.A. below)	
2. At least 21 years old for a restricted privileges ATP Certificate (II.B. below)	
B. English Language Requirement	
C. Good Moral Character	
D. Pilot Qualifications	
1. FAA Commercial Pilot Certificate and an instrument rating **OR** FAA ATP Certificate with restricted privileges	
2. Official U.S. military records as prescribed in 14 CFR § 61.73	
3. A foreign commercial pilot license (CPL) with an instrument rating or a foreign ATP license with instrument privileges issued by an International Civil Aviation Organization (ICAO) country and contains no limitations and a valid verification letter obtained from AFB-720 (14 CFR § 61.71(c))	
E. Valid Certified Knowledge Test Report	
F. Valid Graduation Certificate From an ATP Certification Training Program (CTP)	
G. Current FAA Medical Certificate (at least Third Class) (not required if the test is completed entirely in a flight simulation training device (FSTD))	
H. Title 14 CFR Part 135 Training and Qualification Records 14 CFR § 61.39(a) If using second in command (SIC) time logged in accordance with 14 CFR § 61.159(c)	

II. Aeronautical Experience (Complete A or B)	
A. ATP Certificate 14 CFR § 61.159	
1. 1,500 hours of total flight time	
2. 250 hours as pilot in command (PIC) or as a required SIC performing the duties of PIC while under the supervision of a PIC, or any combination thereof (reference 14 CFR § 61.51 on logging time)	
3. 500 hours of cross-country flight time; 100 hours PIC cross-country flight time	
4. 100 hours of night flight time; 25 hours PIC night (may substitute landings)	
5. 75 hours of instrument flight time	
6. 50 hours of flight time in class (Up to 25 hours may be in a full flight simulator (FFS) representing a multiengine airplane may be credited toward the flight time requirement of 14 CFR § 61.159(a)(3) if the training was accomplished as part of an approved training course in 14 CFR part 121, 135, 141, or 142.)	
B. Restricted Privileges ATP Certificate 14 CFR § 61.160 Applicants for a restricted privileges ATP Certificate must meet the requirements in 1, 2, 3, **OR** 4 below, **AND** the following:	
• 250 hours as PIC, or as a required SIC performing the duties of PIC while under the supervision of a PIC, or any combination thereof (reference 14 CFR § 61.51 on logging time)	
• 200 hours of cross-country flight time; 100 hours PIC cross-country flight time	
• 100 hours of night flight time, 25 hours PIC night flight time (may substitute landings)	
• 75 hours of instrument flight time	
• 50 hours of flight time in class (Up to 25 hours may be in an FFS representing a multiengine airplane may be credited toward the flight time requirement of this paragraph if the training was accomplished as part of an approved training course in 14 CFR part 121, 135, 141, or 142.)	
1. U.S. Military Pilot or Former U.S. Military Pilot	
• 750 hours of total time as pilot	
• Required documentation per 14 CFR § 61.160(a)	
2. Graduate of a Bachelor's Degree Program With an Aviation Major	
• **1,000 hours of total time as pilot** (students who have completed at least 60 credit hours in accordance with 14 CFR § 61.160(b)) **OR** • **1,250 hours of total time as pilot** (students who have completed at least 30, but less than 60 credit hours in accordance with 14 CFR § 61.160(d))	

• Certifying statement on official transcript or other acceptable document	
3. Graduate of an Associate's Degree Program With an Aviation Major	
• **1,250 hours of total time as pilot** (students who have completed at least 30 credit hours in accordance with 14 CFR § 61.160(c))	
• Certifying statement on official transcript or other acceptable document	
4. 1,500 Hours Total Time as a Pilot	
• Meet the requirements of 14 CFR § 61.160(f)	

RESERVED. Paragraphs 5-716 through 5-725.
