VOLUME 5 AIRMAN CERTIFICATION

CHAPTER 2 TITLE 14 CFR PART 61 CERTIFICATION OF PILOTS AND FLIGHT INSTRUCTORS

Section 7 Conduct a Private Pilot Certification, Including Additional Category/Class Ratings

Source Basis:

- **Title 14 CFR Part 3 Subpart C, Designated U.S. Agents for Service.**
- **Title 14 CFR § 61.23, Medical Certificates: Requirement and Duration.**
- **Title 14 CFR § 61.31, Type Rating Requirements, Additional Training, and Authorization Requirements.**
- **Title 14 CFR § 61.43, Practical Tests: General Procedures.**
- **Title 14 CFR § 61.49, Retesting After Failure.**
- **Title 14 CFR § 61.51, Pilot Logbooks.**
- **Title 14 CFR § 61.52, Use of Aeronautical Experience Obtained in Ultralight Vehicles.**
- **Title 14 CFR § 61.63, Additional Aircraft Ratings (Other Than for Ratings at the Airline Transport Pilot Certification Level).**
- **Title 14 CFR § 61.71, Graduates of an Approved Training Program Other Than Under This Part: Special Rules.**
- **Title 14 CFR § 61.103, Eligibility Requirements: General.**
- **Title 14 CFR § 61.105, Aeronautical Knowledge.**
- **Title 14 CFR § 61.107, Flight Proficiency.**
- **Title 14 CFR § 61.109, Aeronautical Experience.**
- **Title 14 CFR § 61.110, Night Flying Exceptions.**
- **Title 14 CFR § 61.111, Cross-Country Flights: Pilots Based on Small Islands.**
- **Title 14 CFR § 61.113, Private Pilot Privileges and Limitations: Pilot in Command.**
- **Title 14 CFR § 61.115, Balloon Rating: Limitations.**
- **Title 14 CFR § 194.211, Alternate Eligibility Requirements for a Person Seeking a Powered-Lift Type Rating.**

5-371 REPORTING SYSTEM(S). Use Safety Assurance System (SAS) Activity Recording (AR) and use the following activity codes, as appropriate:

A. Original Private Pilot Certification: 1503.

B. Additional Private Pilot Category or Class: 1505.

5-372 OBJECTIVE. The objective of this task is to determine if an applicant meets the requirements for certification as a private pilot under Title 14 of the Code of Federal Regulations (14 CFR) part 61 subpart E. Completion of this task results in the issuance of Federal Aviation Administration (FAA) Form 8060-4, Temporary Airman Certificate, Private Pilot Certificate; FAA Form 8060-5, Notice of Disapproval of Application; or a Letter of Discontinuance. A Letter of Discontinuance is issued only when the practical test is discontinued due to unforeseen

circumstances, such as mechanical failure, unforecasted adverse weather, or any other safety concern.

5-373 AIRWORTHINESS COORDINATION.

A. Prior to the Practical Test. Prior to conducting the practical test, the evaluator or an Airworthiness aviation safety inspector (ASI) shall review the applicant's aircraft maintenance records, aircraft logbooks, Airworthiness Certificate, and aircraft registration to determine if the aircraft is eligible and suitable for this practical test. After review, return the documents to the applicant.

B. During the Practical Test. During the practical test, the applicant will review the aircraft maintenance records, logbooks, Airworthiness Certificate, and aircraft registration for the purpose of demonstrating aeronautical knowledge of how to determine whether an aircraft is airworthy.

5-374 ESTABLISHING ELIGIBILITY.

A. Eligibility Requirements. The applicant must meet all the applicable prerequisite requirements of 14 CFR part 61 subpart E. Except for glider or balloon pilots, the applicant must hold at least a third-class medical certificate, or be qualified to operate under BasicMed in lieu of possessing a third-class medical certificate in accordance with 14 CFR § 61.113(i), to be eligible for the original issuance of a Private Pilot Certificate. Applicants for a powered-lift Private Pilot Certificate must also meet all applicable requirements of 14 CFR part 61 subpart E; however, certain alternate requirements may be applicable. Refer to 14 CFR part 194 and Volume 5, Chapter 2, Section 25 for more information.

B. Graduates of an Approved Training Program. Under the provisions of 14 CFR § 61.71, an applicant who graduates from an approved training program under 14 CFR part 141 or 142 is considered to have met the applicable aeronautical experience, aeronautical knowledge, and areas of operation requirements of 14 CFR part 61. This is true only if the applicant presents the graduation certificate and passes the required practical test within the 60-day period after the date of graduation. If the applicant did not graduate from an approved training program or has not applied for the certificate within 60 days, the applicant must meet all applicable aeronautical knowledge, aeronautical experience, and flight proficiency requirements of 14 CFR part 61 subpart E.

C. Graduates of a 14 CFR Part 141 Pilot School With Examining Authority. A 14 CFR part 141 pilot school that holds examining authority under 14 CFR part 141 subpart D may recommend a person who graduated from its course for the appropriate pilot, flight instructor, ground instructor, or rating without taking the FAA knowledge test or practical test. The applicant must have completed the end-of-course test for that specific 14 CFR part 141 rating and course and must have been issued a graduation certificate.

D. Not a Graduate of an Approved School. If the applicant is not a graduate of an approved pilot school, or has not applied for a certificate within 60 days as specified for approved school graduates, the applicant must meet all applicable aeronautical knowledge, aeronautical experience, and flight proficiency requirements of 14 CFR part 61 subpart E.

E. Aeronautical Knowledge.

1) An Airman Knowledge Test Report (AKTR) is the evidence that the applicant has passed the knowledge test for a Private Pilot Certificate.

2) The holder of a category rating for powered aircraft is not required to take a knowledge test for the addition of another category rating to a Private Pilot Certificate.

F. Aeronautical Experience. The applicant must present a pilot logbook, training record, or other reliable records as evidence of meeting the required aeronautical experience for the certificate and rating sought and to substantiate the aeronautical experience shown on FAA Form 8710-1, Airman Certificate and/or Rating Application, or FAA Form 8710-11, Airman Certificate and/or Rating Application—Sport Pilot, as applicable.

1) Military pilot flight time records may be used to show the required flight time if the records meet the requirements of 14 CFR § 61.51.

2) An applicant for a Private Pilot Certificate must have received at least 3 hours of night flight training (except for the glider and balloon ratings) and an instructor endorsement in accordance with the appropriate provisions of 14 CFR § 61.109. Except as provided in 14 CFR § 61.110, the applicant's records must indicate that all required night flight training was received.

3) In accordance with 14 CFR § 61.109, an applicant for a Private Pilot Certificate must have received at least 3 hours of flight training in the control and maneuvering of an airplane (in the applicable category and class of airplane) or powered-lift, as appropriate, solely by reference to instruments.

G. Medical Certification. The evaluator conducting the practical test shall review the applicant's medical certificate to ensure the applicant can act as pilot in command (PIC) for the practical test. Per 14 CFR § 61.23, if a medical certificate is required, make sure the applicant's medical certificate is current. If the applicant is operating under BasicMed in lieu of possessing a valid medical certificate, make sure they hold a valid U.S. driver's license as well as a current Certificate of Completion from an authorized BasicMed medical education course.

H. English Language. See Volume 5, Chapter 2, Section 1 for details.

I. Pilot Certificate Requirement. A first-time applicant for an FAA pilot certificate must present a Student Pilot Certificate. To upgrade a certificate to private pilot, the applicant must possess a sport pilot certificate or a recreational pilot certificate. To obtain an additional category/class rating at the private pilot certification level, the applicant must possess a Private Pilot Certificate, Commercial Pilot Certificate, or Airline Transport Pilot (ATP) Certificate.

5-375 LOGBOOK ENDORSEMENTS.

A. Pretest Flight Training. The applicant's logbook or training record must contain an endorsement from an authorized instructor who certifies the applicant has received and logged 3 hours of flight training within the preceding 2 calendar months from the month of the test in

preparation for the practical test in all categories, except gliders. Gliders require three flights with an authorized instructor in preparation for the test within 2 calendar months.

B. Instructor Endorsement of Applicant's Ability. The applicant's logbook or training record must contain an endorsement from an authorized instructor who certifies that the applicant is prepared to pass the practical test. In addition, the applicant must have a signed FAA Form 8710-1 or FAA Form 8710-11, as appropriate, with the authorized instructor's signature.

C. Instructor Endorsement of Applicant's Knowledge. If applicable, the applicant's logbook or training record must contain an endorsement from an authorized instructor who states that the applicant has demonstrated satisfactory knowledge of the subject areas.

D. Instructor Endorsement of Appropriate Training. An applicant for a Private Pilot Certificate must have logged training and received a logbook endorsement from an authorized instructor on the training required by 14 CFR § 61.107(b) that is appropriate for the private pilot rating sought.

E. Solo Flight Endorsement. The applicant's logbook must contain the appropriate solo flight endorsement(s).

F. Solo Cross-Country Flight Endorsement. The applicant's logbook must contain the appropriate solo cross-country endorsement(s).

G. Deficient Aeronautical Knowledge. If the applicant's knowledge test report shows that one or more questions were missed, the applicant's pilot logbook or training record must contain an endorsement from an authorized instructor who states that the applicant has demonstrated satisfactory knowledge of the subject areas in which the applicant was deficient on that airman knowledge test, as required by 14 CFR § 61.39(a)(6)(iii).

H. Application. The applicant must have a signed FAA Form 8710-1, FAA Form 8710-11, or an application in the Integrated Airman Certification and Rating Application (IACRA) process, as appropriate, with the authorized instructor's signature as required by 14 CFR § 61.39(a)(7).

I. Agent for Service. Applicants with a foreign address for official record purposes must comply with the U.S. agent for service requirements in 14 CFR part 3 subpart C, which require any individual who has a foreign address and no U.S. physical address of record on file with the FAA to designate a U.S. agent for service if they apply for a certificate, rating, or authorization issued under 14 CFR part 47, 61, 63, 65, 67, or 107 or hold a certificate, rating, or authorization issued under any of these parts. Refer to Advisory Circular (AC) 3-1, U.S. Agents for Service on Individuals with Foreign Addresses Who Hold or Apply for Certain Certificates, Ratings, or Authorizations, for information on designating a U.S. agent for service.

5-376 LIMITATIONS.

A. Night Flying Limitations. On August 4, 1997, a complete rewrite of 14 CFR part 61 became effective. Title 14 CFR § 61.110 eliminates the night flying exception for all pilot

applicants, except those applicants who receive flight training in and reside in Alaska and have not received the required aeronautical night flying training as required by 14 CFR § 61.109, as appropriate.

1) A person who receives flight training in and resides in the state of Alaska may be issued a pilot certificate with the limitation "NIGHT FLYING PROHIBITED." This person must comply with the appropriate night flight training requirements of 14 CFR part 61 subpart E within 12 calendar months after the issuance of the pilot certificate.

2) If applicable, a person who does not meet the night flying requirements in 14 CFR § 61.109(d)(2) for gyroplanes, § 61.109(i)(2) for Powered Parachute (PPC) aircraft, or § 61.109(j)(2) for weight-shift-control aircraft may be issued a Private Pilot Certificate with the limitation "NIGHT FLYING PROHIBITED."

3) An evaluator may remove the night flying limitation if the holder complies with the night flying aeronautical experience requirements of 14 CFR § 61.109.

B. Cross-Country Limitations. The limitation "PASSENGER CARRYING PROHIBITED ON FLIGHTS MORE THAN 10 NM FROM [the appropriate island]" shall be entered on the certificate of an applicant whose cross-country experience qualifies under the provisions of 14 CFR § 61.111(c).

C. International Civil Aviation Organization (ICAO) Cross-Country Requirement. The limitation "HOLDER DOES NOT MEET THE CROSS-COUNTRY FLIGHT REQUIREMENTS OF ICAO" must be entered on the certificate of an applicant whose cross-country experience qualifies under the provisions of 14 CFR § 61.111. An applicant may apply to remove the limitations when they meet the cross-country training requirements outlined in 14 CFR § 61.109 by presenting their records to an evaluator to remove the limitation.

D. Powered-Lift. Under 14 CFR § 194.211(b)(1), applicants for an initial powered-lift type rating to be completed concurrently with a powered-lift category rating would not need to concurrently hold or obtain the instrument-powered-lift rating at the same time they obtain their powered-lift type and category ratings. Instead, the applicant applying for an initial powered-lift type rating pursuant to 14 CFR § 194.211(b) could choose to take the instrument-powered-lift rating practical test independent from the powered-lift type rating practical test and powered-lift category rating practical test. Opting to take the instrument-powered-lift rating practical test separately results in a limitation "visual flight rules (VFR) ONLY" being placed on the type rating. Specifically, applicants for a Private Pilot Certificate are not required to obtain an instrument rating concurrently with their Private Pilot Certificate, so long as the powered-lift is not large or turbojet-powered. For information on this limitation specific to powered-lift, see Volume 5, Chapter 2, Section 25.

E. Glider Limitations.

1) Tow/launch limitations are no longer placed on an individual's pilot certificate. The provisions for limiting tow/launch procedures are addressed in 14 CFR § 61.31(j). Individuals who currently hold a pilot certificate containing the limitations may retain their current certificate until they:

a) Seek another rating or pilot certificate and have the limitation removed at that time; or

b) Receive the required training and logbook endorsement and have their pilot certificate reissued without the limitations.

2) An individual who has the necessary logbook endorsements and is in compliance with 14 CFR § 61.31(j) will be permitted to perform the tow/launch procedures that they have been authorized to perform, even if the individual has a tow/launch limitation on their pilot certificate.

F. Lighter-Than-Air (LTA) Limitations. If appropriate, the evaluator shall place one of the following limitations on a certificate with LTA category and balloon class ratings:

- "Limited to hot air balloons with airborne heater."
- "Limited to gas balloons."

5-377 CATEGORIES AND CLASSES. The category of the aircraft used for the practical test is placed on a Private Pilot Certificate. With the exception of private pilot glider and powered-lift certificates, the class rating is also placed on the certificate.

NOTE: Applicants of a powered-lift category on their Private Pilot Certificate will be issued a type rating for the appropriate powered-lift in accordance with 14 CFR § 61.31(a).

A. Airplane Class Ratings. The following class ratings are originally issued or added to private pilot airplane certificates:

- Single-Engine Land (SEL).
- Multiengine Land (MEL).
- Single-Engine Sea (SES).
- Multiengine Sea (MES).

B. Rotorcraft Class Ratings. The following class ratings are originally issued or added to private pilot rotorcraft certificates:

- Helicopter.
- Gyroplane.

C. LTA Class Ratings. The following class ratings are originally issued or added to private pilot LTA certificates:

- Airship.
- Balloon.

D. Glider Category Rating. Only the glider category rating is added to a Private Pilot Certificate, to read: "GLIDER."

E. Weight-Shift-Control Ratings. The following class ratings are originally issued or added to private pilot weight-shift-control aircraft certificates:

- Weight-shift-control aircraft land.
- Weight-shift-control aircraft sea.

F. PPC Ratings. The following class ratings are originally issued or added to private pilot PPC certificates:

- PPC land.
- PPC sea.

G. Powered-Lift Category Rating. Only the powered-lift category rating is added to a Private Pilot Certificate, to read: "POWERED-LIFT." Applicants of a powered-lift category on their Private Pilot Certificate will be issued a type rating for the appropriate powered-lift in accordance with 14 CFR § 61.31(a).

5-378 SPORT PILOT UPGRADES. A sport pilot who desires certification as a private pilot must meet all the prerequisite eligibility requirements appropriate to the category and class sought for the Private Pilot Certificate. Since a sport pilot has limited privileges, the sport pilot's logbook must be endorsed by a flight instructor for each operation not authorized by the sport pilot certificate.

A. Knowledge Test. The applicant for an upgrade to a Private Pilot Certificate must also pass the appropriate private pilot knowledge test.

B. Sport Pilot Certificate. The Private Pilot Certificate supersedes the sport pilot certificate. If a different category of aircraft is used, the sport pilot privileges endorsed in the pilot's logbook are still valid at the sport pilot certification level and are shown on the back of the Private Pilot Certificate.

5-379 RECREATIONAL PILOT UPGRADES. A recreational pilot who desires certification as a private pilot must meet all the prerequisite eligibility requirements appropriate to the category and class sought for the Private Pilot Certificate. Except as provided in 14 CFR § 61.101(c), a recreational pilot is limited to flight within 50 nautical miles (NM) of the departure airport.

A. Knowledge Test. The applicant for an upgrade to a Private Pilot Certificate must also pass the appropriate private pilot knowledge test unless the applicant previously passed the appropriate private pilot knowledge test when the applicant obtained their recreational pilot certificate. There are short private pilot knowledge tests authorized for holders of recreational pilot certificates with airplane, helicopter, and gyroplane privileges who wish to upgrade to a Private Pilot Certificate for the same category of aircraft.

B. Recreational Pilot Certificate. The Private Pilot Certificate supersedes the recreational pilot certificate. If a different category of aircraft is used, the recreational pilot privileges from the superseded certificate are shown on the Private Pilot Certificate.

5-380 PREREQUISITES AND COORDINATION REQUIREMENTS.

A. Prerequisites. This task requires knowledge of 14 CFR part 61 and familiarity with the applicable practical test standards (PTS) or Airman Certification Standards (ACS) and FAA policies.

B. ASI Coordination. This task may require evaluators to coordinate with the airworthiness unit and with the Airmen Certification Branch (AFB-720) or the Delegation and Resource Branch (AFG-970).

5-381 REFERENCES, FORMS, AND JOB AIDS.

A. References (current editions):

- Title 14 CFR Parts 1, 3 Subpart C, 61, 91, 141, 142, 187 Appendix A, and 194.
- Private Pilot PTS or Private Pilot ACS, as appropriate.

B. Forms:

- FAA Form 8060-4, Temporary Airman Certificate.
- FAA Form 8060-5, Notice of Disapproval of Application.
- FAA Form 8710-1, Airman Certificate and/or Rating Application.
- FAA Form 8710-11, Airman Certificate and/or Rating Application—Sport Pilot.

C. Job Aids. Sample letters.

5-382 PROCEDURES.

A. Schedule the Appointment. Advise the applicant to bring the following documents to the appointment:

1) A correctly filled out FAA Form 8710-1 application, or an FAA Form 8710-11 application if seeking a weight-shift-control aircraft or PPC rating, to be completed in ink or typewritten;

2) Photo identification;

3) A Student Pilot Certificate, sport pilot certificate, recreational pilot certificate, or Private Pilot Certificate, if for an additional category/class rating at the private pilot certification level;

4) At least a third-class medical certificate or, if operating under BasicMed in lieu of possessing a valid third-class medical certificate, a valid U.S. driver's license as well as a current Certificate of Completion from an authorized BasicMed medical education course;

5) A Statement of Demonstrated Ability (SODA), if applicable;

6) A knowledge test report, if applicable;

7) An FAA-approved school graduation certificate, if applicable;

8) Personal logbooks or other acceptable records that substantiate the flight experience shown on the application form;

9) The aircraft maintenance records;

10) The aircraft Airworthiness Certificate;

11) The aircraft registration; and

12) The Federal Communications Commission (FCC) aircraft station license, if applicable.

B. Applicant Arrives for the Appointment.

1) Collect and review the documents indicated above.

2) An ASI will open a SAS AR record.

C. Review the Application. Verify that the information on the application is presented accurately and completely.

1) In Section I, ensure that the applicant has checked "Private." If the applicant is seeking an additional airplane rating, ensure that the applicant has also checked "Added Rating" and the appropriate aircraft category/class.

2) Check the application for accuracy, using the instructions attached to FAA Form 8710-1 or FAA Form 8710-11 and any additional instructions found in Volume 5, Chapter 1, Section 3.

3) Ensure that the flight instructor has endorsed the application no more than 2 calendar months preceding the month the application was submitted.

D. Evaluator Verifies the Applicant's Identity. Inspect acceptable forms of identification to establish the applicant's identity. Compare the identification with the personal information provided on the application (see Volume 5, Chapter 1, Section 3).

1) If the applicant's identity can be verified, proceed with the certification.

2) If the applicant's identity cannot be verified because of lack of identification or unacceptable identification, explain what types of identification are acceptable. Advise the applicant to return with appropriate identification to reapply.

3) If the applicant's identity appears to be different from the information supplied on the application, or it appears that an attempt at falsification has been made, do not continue testing. See Volume 5, Chapter 1, Section 3, Paragraph 5-55, Verification of Applicant's Identity, for more information.

E. Establish Eligibility. Determine if the applicant meets the specific eligibility, knowledge, and experience requirements for certification as a private pilot (14 CFR §§ 61.103, 61.105, 61.107, and 61.109).

1) If the applicant is applying for other than a glider or balloon rating, ensure that the applicant's medical certificate is current. If the applicant is operating under BasicMed in lieu of possessing a valid third-class medical certificate, ensure they hold a valid U.S. driver's license and a current Certificate of Completion from an authorized BasicMed medical education course.

2) Inspect the applicant's medical certificate and SODA, if applicable, to ensure that it does not bear any limitations that would make a special medical flight test necessary. If a special medical flight test is necessary, see Volume 5, Chapter 8.

3) Examine the record of flight time in Section III of the application to determine if the applicant has the minimum flight experience required for the certificate and ratings sought (14 CFR § 61.109). The applicant must list at least the aeronautical experience required for the airman certificate and rating sought. Graduates of 14 CFR part 141 pilot schools or 14 CFR part 142 training centers must provide their aeronautical experience in Section III of the application, even though the graduation certificate is evidence of having completed the course of training. All applicants are encouraged to complete Section III of the application. The FAA Form 8710-1 and FAA Form 8710-11 applications remain on file with the FAA and can be used to substantiate past aeronautical experience if an individual ever loses their logbook.

4) If the applicant is applying for a test on the basis of graduation from an approved training course, inspect the applicant's graduation certificate to verify that they meet the requirements of 14 CFR § 61.71. Ensure that the applicant will be able to pass the practical test within 60 calendar days from the date on the graduation certificate. If not, the applicant must apply for the pilot certificate or rating under 14 CFR part 61 and meet all the applicable aeronautical experience requirements under 14 CFR part 61 for the pilot certificate or rating sought.

5) Examine the applicant's logbook and/or other reliable record(s) to verify that all aeronautical knowledge, aeronautical experience, and required instructor endorsements are recorded.

6) If the applicant is located on an island from which the required flights cannot be accomplished without flying more than 10 NM over water, refer to 14 CFR § 61.111.

7) Examine the knowledge test report or test report from an approved school with knowledge test authority, as applicable.

8) If the applicant has checked the "Yes" box of Section IV, verify that the applicant meets the requirements of 14 CFR § 61.49.

F. Requirements for an Additional Category/Class Rating. The requirements are the same as in subparagraph E above; however, the knowledge test is not required if the applicant already has a powered aircraft (other than a glider or balloon) rating.

G. Aircraft Requirements. The evaluator conducting the practical test or an Airworthiness ASI should review the applicant's aircraft maintenance records, aircraft logbooks, Airworthiness Certificate, FCC license (if applicable), and aircraft registration to determine if the aircraft is airworthy and suitable for this practical test. After review, return the documents to the applicant.

H. Discrepancies. If a discrepancy that cannot be immediately corrected exists in any of the documents, return the application and all submitted documents to the applicant. Inform the applicant of the reasons for ineligibility and explain how the applicant may correct the discrepancies.

I. Conduct the Practical Test. After determining the applicant is eligible and meets all prerequisites for the certificate/rating sought, accept the application and conduct the practical test in accordance with the applicable ACS or PTS.

1) An evaluator may give an applicant who is retesting credit for the areas of operation successfully completed on the previous practical test, provided the previous test was conducted within 60 days before the retest. If the previous test was conducted more than 60 days before the retest, test the applicant in all applicable areas of operation.

2) If the practical test is not completed for reasons other than unsatisfactory performance, issue the applicant a Letter of Discontinuance (see Figure 5-30, Sample Letter of Discontinuance). Return the application and all submitted documents to the applicant.

J. Unsatisfactory Performance. If the applicant did not meet the applicable standards for the certificate sought, inform the applicant of the reasons for the unsatisfactory performance.

1) Prepare FAA Form 8060-5 in duplicate, as described in Volume 5, Chapter 1, Section 6.

2) The evaluator shall list the area(s) of operation in which the applicant did not meet the standard, any area(s) of operation not tested, and the number of practical test failures. The evaluator should also list the tasks failed or tasks not tested within any unsatisfactory or partially completed area(s) of operation. Enter the date the practical test was first discontinued in accordance with 14 CFR § 61.43(f)(1) (emphasis on the start of "the 60-day period after the date the practical test was discontinued" provision). That date will be maintained on FAA Form 8060-5 for all subsequent discontinuances. For example, if an applicant fails the oral portion of the practical test, that date will be entered on FAA Form 8060-5 in the section noted as "Upon Reapplication You Will Be Reexamined on the Following" and will be maintained on FAA Form 8060-5 for all subsequent discontinuances.

3) As appropriate, mail the completed certification file to the managing Flight Standards District Office (FSDO) no later than 7 calendar days after the completion of the test. Forward the completed file to AFB-720, or to AFG-970 for weight-shift-control or PPC certifications. IACRA files may be sent directly to AFB-720.

4) Return all submitted documents not forwarded to AFB-720 or AFG-970 to the applicant.

5) Complete applicable portions of the "Designated Examiner or Airman Certification Representative Report" section in FAA Form 8710-1 or FAA Form 8710-11, as appropriate, indicating the type of test, the duration of the flight portion, the unsatisfactory outcome of the test, and the evaluator's designation number. The evaluator may also provide an entry in the applicant's records in accordance with 14 CFR § 61.51.

K. Satisfactory Performance. Issue FAA Form 8060-4 when the applicant has met all requirements for the certificate and/or rating sought.

1) Prepare FAA Form 8060-4 in duplicate, as indicated in Volume 5, Chapter 1, Section 5.

2) Enter the correct limitations, if appropriate, in the space provided on the Temporary Airman Certificate. Give a copy of the temporary certificate to the applicant. Below are some samples of limitations that may be placed on the person's Private Pilot Certificate:

a) Enter "NIGHT FLYING PROHIBITED [aircraft category]" if the applicant receives flight training in and resides in the state of Alaska but does not meet the night flight training requirements, or the applicant does not meet the night flying requirements in 14 CFR § 61.109(d)(2), (i)(2), or (j)(2).

b) Enter "PASSENGER CARRYING PROHIBITED ON FLIGHTS MORE THAN 10 NM FROM [the appropriate island]" and "HOLDER DOES NOT MEET THE CROSS-COUNTRY FLIGHT REQUIREMENTS OF ICAO" for an applicant whose cross-country aeronautical experience qualifies under 14 CFR § 61.111(c).

3) If the pilot certificate is issued in a foreign country, refer to 14 CFR § 61.13(a) and 14 CFR part 187 appendix A.

4) Complete the appropriate sections of the application.

5) Verify that all information on FAA Form 8060-4 is correct. Sign FAA Form 8060-4 and direct the applicant to sign on Section VII.

6) As appropriate, mail the completed certification file to the managing FSDO no later than 7 calendar days after the completion of the test. Forward the completed file to AFB-720, or to AFG-970 for weight-shift-control or PPC certifications. IACRA files may be sent directly to AFB-720.

7) Return all documents to the applicant, except for the documents that are required to be submitted to AFG-970.

8) Complete applicable portions of the "Designated Examiner or Airman Certification Representative Report" section in FAA Form 8710-1 or FAA Form 8710-11, as appropriate, indicating the type of test, the duration of the flight portion, the satisfactory outcome of the test, and the evaluator's designation number. The evaluator may also provide an entry in the applicant's records in accordance with 14 CFR § 61.51.

L. SAS AR. An ASI will complete the SAS AR record.

5-383 TASK OUTCOMES. Completion of this task results in the issuance of one of the following:

- Temporary Airman Certificate,
- Notice of Disapproval of Application, or
- Letter of Discontinuance.

5-384 FUTURE ACTIVITIES.

- The applicant may return for an added category, class, or type rating.
- The applicant may return for an upgraded certificate.

Figure 5-30. Sample Letter of Discontinuance

FAA letterhead

[*Date*]

[*Applicant's name and address*]

Dear [*applicant's name*]:

On this date, you successfully completed the oral portion of the practical test for a [*indicate grade*] certificate with an [*indicate category*] category and [*indicate class*] class rating. The practical test was discontinued because of [*indicate reason*].

If application is made by [*indicate date 60 days from date of letter*], this letter may be used to show the following portions of the practical test which have been completed satisfactorily:

[*Indicate areas of operation completed on the test*]

After [*indicate expiration date*], you must repeat the entire practical test.

This letter does not extend the expiration date as shown on the knowledge test results, medical certificate, or required endorsements.

Sincerely,

[*Signature of inspector conducting practical test*]

RESERVED. Paragraphs 5-385 through 5-400.
