VOLUME 5 AIRMAN CERTIFICATION

CHAPTER 2 TITLE 14 CFR PART 61 CERTIFICATION OF PILOTS AND FLIGHT INSTRUCTORS

Section 8 Conduct a Commercial Pilot Certification Including Additional Category/Class Ratings

Source Basis:

- **Title 14 CFR Part 3 Subpart C, Designated U.S. Agents for Service.**
- **Title 14 CFR § 61.23, Medical Certificates: Requirement and Duration.**
- **Title 14 CFR § 61.43, Practical Tests: General Procedures.**
- **Title 14 CFR § 61.49, Retesting After Failure.**
- **Title 14 CFR § 61.51, Pilot Logbooks.**
- **Title 14 CFR § 61.52, Use of Aeronautical Experience Obtained in Ultralight Vehicles.**
- **Title 14 CFR § 61.63, Additional Aircraft Ratings (Other Than for Ratings at the Airline Transport Pilot Certification Level).**
- **Title 14 CFR § 61.123, Eligibility Requirements: General.**
- **Title 14 CFR § 61.125, Aeronautical Knowledge.**
- **Title 14 CFR § 61.127, Flight Proficiency.**
- **Title 14 CFR § 61.129, Aeronautical Experience.**
- **Title 14 CFR § 61.131, Exceptions to the Night Flying Requirements.**
- **Title 14 CFR § 61.133, Commercial Pilot Privileges and Limitations.**
- **Title 14 CFR § 194.203, Alternate Qualification Requirements for Certain Flight Instructors.**
- **Title 14 CFR § 194.211, Alternate Eligibility Requirements for a Person Seeking a Powered-Lift Type Rating.**

5-401 REPORTING SYSTEM(S). Use Safety Assurance System (SAS) Activity Recording (AR) and use the following activity codes, as appropriate:

A. Original Certification: 1504.

B. Additional Category or Class: 1505.

5-402 OBJECTIVE. The objective of this task is to determine if the applicant meets the requirements for certification as a commercial pilot under Title 14 of the Code of Federal Regulations (14 CFR) part 61 subpart F. Successful completion of this task results in the issuance of Federal Aviation Administration (FAA) Form 8060-4, Temporary Airman Certificate—Commercial Pilot; FAA Form 8060-5, Notice of Disapproval of Application; or a Letter of Discontinuance.

5-403 GENERAL.

A. Airworthiness Coordination.

1) Prior to conducting the practical test, the evaluator conducting the practical test or an Airworthiness aviation safety inspector (ASI) shall review the aircraft maintenance records, aircraft logbook, Airworthiness Certificate, and aircraft registration to determine if the aircraft is eligible and suitable for the practical test. After review, return the documents to the applicant.

2) During the practical test, the applicant will review the aircraft maintenance records, logbooks, Airworthiness Certificate, and aircraft registration for the purpose of demonstrating aeronautical knowledge of how to determine whether an aircraft is airworthy.

B. Pilot-in-Command (PIC) Duties. Title 14 CFR § 61.133 allows a commercial pilot to act as PIC of an aircraft for compensation or hire. During the practical test, evaluators should determine whether the applicant is aware of the types of flight operations and other regulatory requirements found in 14 CFR parts 133, 135, and 137 that affect commercial pilot privileges.

C. Commercial Pilot Certificate. To apply for a Commercial Pilot Certificate, the applicant must hold a Private Pilot Certificate or meet the requirements of 14 CFR § 61.73. Any limitations on the applicant's Private Pilot Certificate that were not removed before the commercial certificate is issued must be placed on the commercial certificate, unless the applicant presents evidence that the limitations no longer apply.

5-404 ESTABLISHING ELIGIBILITY.

A. Eligibility Requirements. The applicant must meet all the applicable prerequisite requirements of 14 CFR part 61 subpart F. Except for glider or balloon pilots, the applicant must hold at least a third-class medical certificate, or be qualified to operate under BasicMed in lieu of possessing a third-class medical certificate in accordance with 14 CFR § 61.113(i), to be eligible for the original issuance of a Commercial Pilot Certificate. Applicants for a powered-lift Commercial Pilot Certificate must also meet all applicable requirements of 14 CFR part 61 subpart F; however, certain alternate requirements may be applicable. Refer to 14 CFR part 194 and Volume 5, Chapter 2, Section 25 for more information.

B. Graduate of an Approved School. Under the provisions of 14 CFR § 61.71(a), an applicant who graduates from an approved training program under 14 CFR part 141 or 142 is considered to have met the applicable aeronautical experience, aeronautical knowledge, and areas of operation requirements of 14 CFR part 61 if the applicant presents the graduation certificate and passes the required practical test within the 60-day period after the date of graduation.

C. Graduate of an Approved School With Examining Authority. Under 14 CFR part 141 subpart D, a pilot school that holds examining authority may recommend a person who graduated from its course for the appropriate pilot, flight instructor, or ground instructor certificate, and rating, without taking the FAA practical test.

D. Not a Graduate of an Approved School. If the applicant is not a graduate of an approved pilot school, or has not applied for a Commercial Pilot Certificate within 60 days as specified for approved school graduates, the applicant must meet all applicable aeronautical knowledge, aeronautical experience, and flight proficiency requirements of 14 CFR part 61 subpart F.

E. Second-in-Command (SIC) Time. The evaluator will ensure that SIC time credited toward the commercial pilot certification requirements was accrued in an aircraft that required more than one pilot (per 14 CFR § 61.51(f)).

F. Logbook Endorsements.

1) As specified by 14 CFR § 61.129, the applicant's logbook must include 3 hours of flight training with an authorized instructor in preparation for the practical test, which must have been performed within the preceding 2 calendar months from the month of the test.

2) The applicant's logbook or training record must contain an endorsement from an authorized instructor who certifies that the applicant is prepared to pass the practical test. In addition, the applicant must have a signed FAA Form 8710-1, Airman Certificate and/or Rating Application, with the authorized instructor's signature.

3) The applicant's logbook or training record must contain an endorsement from an authorized instructor who states that the applicant has demonstrated satisfactory knowledge of the subject areas in which the applicant was deficient on the airman knowledge test.

4) An applicant for a Commercial Pilot Certificate must have logged training and received a logbook endorsement from an authorized instructor on the training required by 14 CFR § 61.127(b) that is appropriate for the commercial pilot rating sought.

5) The applicant's logbook must contain the appropriate solo flight endorsement(s), if applicable.

NOTE: Applicants for a powered-lift Commercial Pilot Certificate may have been endorsed by an instructor pilot at a manufacturer instead of an authorized instructor in accordance with 14 CFR § 194.203. Refer to 14 CFR part 194 and Volume 5, Chapter 2, Section 25 for more information.

G. Aeronautical Knowledge. An Airman Knowledge Test Report (AKTR) is the only acceptable proof that the applicant passed the knowledge test for a Commercial Pilot Certificate. The FAA no longer requires an embossed, raised seal on the AKTR. Evaluators do not need to verify the seal is present on the AKTR before conducting the certification test. The holder of a category rating for powered aircraft is not required to take a knowledge test for the addition of another category rating to a Commercial Pilot Certificate.

H. Aeronautical Experience. The applicant must present a pilot logbook training record or other reliable record(s) as evidence of meeting the required aeronautical experience.

1) Military pilot flight time records may be used to show the required flight time if the records meet the requirements of 14 CFR § 61.51.

2) An applicant for a Commercial Pilot Certificate must have received the required minimum night flying aeronautical experience. An exception is made for persons who reside in Alaska, who may have their training delayed, but only in accordance with 14 CFR § 61.131.

I. English Language. See Volume 5, Chapter 2, Section 1 for details.

J. Agent for Service. Applicants with a foreign address for official record purposes must comply with the U.S. agent for service requirements in 14 CFR part 3 subpart C, which require any individual who has a foreign address and no U.S. physical address of record on file with the FAA to designate a U.S. agent for service if they apply for a certificate, rating, or authorization issued under 14 CFR part 47, 61, 63, 65, 67, or 107 or hold a certificate, rating, or authorization issued under any of these parts. Refer to Advisory Circular (AC) 3-1, U.S. Agents for Service on Individuals with Foreign Addresses Who Hold or Apply for Certain Certificates, Ratings, or Authorizations, for information on designating a U.S. agent for service.

5-405 LIMITATIONS.

A. Operating Limitations. Because of specific operating conditions, Commercial Pilot Certificates may have certain operating limitations. The airman must observe any operating limitation until the limitation is removed from the certificate. Any limitations on the Private Pilot Certificate that were not removed before the commercial certificate was issued must be placed on the commercial certificate, unless the applicant demonstrates or presents evidence that the limitations no longer apply. Applicants with a medical impairment that prevents them from flying at night would not be able to meet the requirements for night solo aeronautical experience that is required by 14 CFR § 61.129 at the commercial pilot level. Those applicants would be issued a certificate with the limitation “Night Flying Prohibited” as a PIC or as a “Required Pilot Flight Crewmember.”

> NOTE: On August 4, 1997, a complete rewrite of 14 CFR part 61 became effective. Title 14 CFR § 61.131 eliminates the night flying exception for all pilot applicants, except those applicants who receive flight training in and reside in Alaska and have not received the required aeronautical night flying training required by 14 CFR § 61.131, as appropriate. Those applicants may be issued a certificate with the limitation “Night Flying Prohibited.” However, they must comply with the appropriate night aeronautical flight training requirements (14 CFR § 61.129, as appropriate) within the 12-calendar-month period after the issuance of the pilot certificate. The certificate will be considered invalid for use at the end of 12 calendar months unless the appropriate night training requirements of 14 CFR § 61.129 are met.

B. Powered-Lift. Under 14 CFR § 194.211(b)(1), applicants for an initial powered-lift type rating to be completed concurrently with a powered-lift category rating would not need to concurrently hold or obtain the instrument-powered-lift rating at the same time they obtain their powered-lift type and category ratings. Instead, the applicant applying for an initial powered-lift

type rating pursuant to 14 CFR § 194.211(b) could choose to take the instrument-powered-lift rating practical test independent from the powered-lift type rating practical test and powered-lift category rating practical test. Opting to take the instrument-powered-lift rating practical test separately results in a limitation "visual flight rules (VFR) only" being placed on the type rating. For information on this limitation specific to powered-lift, see Volume 5, Chapter 2, Section 25.

5-406 PILOT CERTIFICATE LEVEL AND CATEGORY AND CLASS RATING.

A. Commercial Pilot Certificate. The following are the aircraft category and class ratings for the Commercial Pilot Certificate:

- Airplane Single-Engine Land (ASEL),
- Airplane Single-Engine Sea (ASES),
- Airplane Multiengine Land (AMEL),
- Airplane Multiengine Sea (AMES),
- Rotorcraft Helicopter,
- Rotorcraft Gyroplane,
- Powered-Lift,
- Glider,
- Lighter-Than-Air (LTA) Airship, and
- LTA Balloon.

B. LTA Class Ratings.

1) A commercial pilot with an LTA category rating may instruct in balloons or airships, as appropriate. The Commercial Pilot Practical Test Standards for Lighter-Than-Air Category contains areas of operation that specifically test flight instructor responsibilities.

2) At their discretion, evaluators are authorized to omit Area of Operation I, Fundamentals of Instructing, when conducting practical tests for those airmen who hold a current flight instructor certificate and who are applying for a Commercial Pilot Certificate with an LTA category and an airship, balloon (airborne heater), or balloon (gas) rating. In addition, evaluators are authorized to use applicable portions of the balloon (airborne heater) practical test standards (PTS) or Airman Certification Standards (ACS) when conducting initial practical tests for balloon (gas) certification.

C. LTA Limitations. If appropriate, the evaluator places one of the following limitations on a certificate with LTA category and balloon class ratings:

- "LIMITED TO HOT AIR BALLOONS WITH AIRBORNE HEATER."
- "LIMITED TO HOT AIR BALLOONS WITHOUT AIRBORNE HEATER."

D. Powered-Lift Category Rating. Only the powered-lift category rating is added to a Commercial Pilot Certificate, to read "POWERED-LIFT." Applicants of a powered-lift category on their Private Pilot Certificate will be issued a type rating for the appropriate powered-lift in accordance with 14 CFR § 61.31(a).

E. Glider Category Rating. Only the glider category rating is added to a Commercial Pilot Certificate, to read: "GLIDER."

F. Private Pilot Privileges. The Commercial Pilot Certificate supersedes the Private Pilot Certificate. If a different category of aircraft is used for the practical test, the private pilot privileges from the superseded certificate are shown on the Commercial Pilot Certificate under private privileges.

5-407 PREREQUISITES AND COORDINATION REQUIREMENTS.

A. Prerequisites. This task requires knowledge of the regulatory requirements of 14 CFR part 61, the applicable ACS or PTS, and FAA policies.

B. Coordination. This task may require coordination with the airworthiness unit and with the Airmen Certification Branch (AFB-720).

5-408 REFERENCES, FORMS, AND JOB AIDS.

A. References (current editions):

- Title 14 CFR Parts 1, 3, 61, 91, 141, 142, and 187 Appendix A.
- The Commercial Pilot PTS or the Commercial Pilot ACS, as appropriate.

B. Forms:

- FAA Form 8060-4, Temporary Airman Certificate.
- FAA Form 8060-5, Notice of Disapproval of Application.

C. Job Aids. Sample letters.

5-409 PROCEDURES.

A. Schedule the Appointment. The ASI will open a SAS AR record and advise the applicant to bring the following documents to the appointment:

1) A properly completed FAA Form 8710-1.

a) The applicant must complete Sections I, II, III, IV, and V. Section I must have blocks A through O1 completed in their entirety. If a flight test is administered, Section IIA1 must indicate the aircraft used during the flight test and the "Total Time" in block 2a. The aircraft listed must match the aircraft listed on the reverse side of the application. Section IIC must be completed when the applicant graduated from an FAA-approved course. Ensure the applicant has given the school name and location (city and state). Section IID must also be completed if the commercial application is based off the airman's foreign license. Also, the airman must have had their foreign license verified for validity prior to making application. The verification letter must be attached to the commercial application. Per 14 CFR § 61.39(a)(7), the applicant must complete Section III, Record of Pilot Time. As a special emphasis item, the evaluator must review the applicant's aeronautical experience recorded on FAA Form 8710-1

and in the applicant's logbook/training record to ensure compliance with the appropriate aeronautical experience requirements for the certificate and/or rating sought. Section IV must be answered "Yes" or "No" if a practical test was administered. If "Yes," ensure the airman's Notice of Disapproval is included with the approved application. If the applicant has lost the Notice of Disapproval, attach a statement to that effect. Section V must be signed and dated by the applicant.

b) In Section III of FAA Form 8710-1, the applicant must list at least the aeronautical experience required for the airman certificate and rating sought. Graduates of 14 CFR part 141 pilot schools or 14 CFR part 142 training centers must provide their aeronautical experience in Section III, even though the graduation certificate is evidence of having completed the course of training.

c) If aeronautical experience has no bearing on the airman certification action being sought, it is not necessary for an applicant to complete Section III. For example, flight instructor recency applications, flight instructor reinstatement applications, ground instructor qualification applications, and pilot type rating applications would be examples for which aeronautical experience would not have a bearing on the airman certification action; thus, the applicant would not be required to complete Section III of the application. However, all applicants are encouraged to complete Section III because it remains on file with the FAA and can be used to substantiate past aeronautical experience in the case of a lost logbook.

2) An appropriate airman certificate per 14 CFR § 61.123(h).

3) At least a current third-class medical certificate (FAA Form 8500-9, Medical Certificate _____ Class), or a valid U.S. driver's license and a current Certificate of Completion from an authorized BasicMed medical education course, if applicable.

4) A knowledge test report, if applicable.

5) A school graduation certificate, if required by 14 CFR § 61.71.

6) Personal logbooks or other records substantiating the flight experience shown on the application form.

7) The aircraft maintenance records.

8) The aircraft Airworthiness Certificate.

9) The aircraft registration.

10) An acceptable form of photo identification.

11) The Federal Communications Commission (FCC) aircraft station license, if applicable.

B. Applicant Arrives for the Appointment. Collect the documents listed above.

C. Agent for Service. If the applicant has no U.S. physical address of record on file with the FAA, the issuer will ensure that the applicant is in compliance with the U.S. agent for service requirements in 14 CFR part 3 subpart C, which require any individual who has a foreign address and no U.S. physical address of record on file with the FAA to designate a U.S. agent for service if they apply for a certificate, rating, or authorization issued under 14 CFR part 47, 61, 63, 65, 67, or 107 or hold a certificate, rating, or authorization issued under any of these parts. The applicant should refer to AC 3-1 for information on designating a U.S. agent for service.

D. Review the Application, FAA Form 8710-1.

1) In Section I, ensure that the applicant has checked "Commercial." If the applicant is seeking a rating other than an instrument rating, ensure that they have checked "Added Rating."

2) Check the application for accuracy, using the instructions attached to FAA Form 8710-1 and guidance found in Volume 5, Chapter 1, Section 3.

3) Ensure that the flight instructor has signed the endorsement block no more than 2 calendar months prior to the month the application was submitted.

E. Verify the Applicant's Identity. Inspect acceptable forms of identification to establish the applicant's identity. Compare the identification with the personal information provided on FAA Form 8710-1 (see Volume 5, Chapter 1, Section 3).

1) If the applicant's identity can be verified, proceed with the certification.

2) If the applicant's identity cannot be verified because of lack of identification or inadequate identification, explain what types of identification are acceptable. Advise the applicant to return with appropriate identification to reapply.

3) If the applicant's identity appears to be different from the information supplied on FAA Form 8710-1, or it appears that an attempt at falsification has been made, do not continue with this certification. See Volume 5, Chapter 1, Section 3, Subparagraph 5-55D, Applicant Identification Anomalies, for more information.

F. Airmen Requirements for Original Issuance. Determine if the applicant meets the specific eligibility, knowledge, competency, and experience requirements for certification as a commercial pilot (refer to 14 CFR §§ 61.123, 61.125, 61.127, and 61.129). The following list expands on the basic requirements:

1) If the applicant is applying for a powered aircraft rating, ensure that the applicant holds at least a current third-class medical certificate or, if operating under BasicMed in lieu of possessing a valid third-class medical certificate, a valid U.S. driver's license as well as a current Certificate of Completion from an authorized BasicMed medical education course.

2) Inspect the applicant's medical certificate and Statement of Demonstrated Ability (SODA), if applicable, to ensure that it does not bear any limitations that would make a special

medical flight test necessary. If a special medical flight test is necessary, see Volume 5, Chapter 8.

3) Have the applicant present proof of aeronautical knowledge and flight proficiency in accordance with 14 CFR §§ 61.125, 61.127, and 61.129. Use an acceptable logbook or other reliable record that conforms to 14 CFR § 61.51 requirements.

4) If the applicant is applying for a test on the basis of graduation from an approved training program under 14 CFR part 141 or 142, inspect the applicant's graduation certificate to verify that the applicant is in compliance with the requirements of 14 CFR § 61.71(a), which requires the applicant's graduation certificate to be dated within 60 days after the date of graduation. If the graduation certificate is beyond the 60-day period after the graduation, the applicant must apply for the pilot certificate or rating under 14 CFR part 61 and meet all the applicable aeronautical experience requirements for the pilot certificate or rating sought.

5) Check the record of flight time in Section III of the application to determine if the applicant has the minimum aeronautical experience required for the certificate and ratings sought under 14 CFR part 61 or 141.

6) Check FAA Form 8710-1 to determine if the applicant has failed the commercial pilot practical test previously. If so, check the applicant's FAA Form 8710-1 for the required certified flight instructor's signature verifying that the applicant has received the necessary required training.

7) Examine the commercial pilot knowledge test report.

8) Ensure that SIC pilot time was acquired in an aircraft with a type certification that requires an SIC or in an aircraft operated in compliance with a regulation that requires an SIC.

G. Airmen Requirements for Additional Category and Class Rating. These requirements are the same as in subparagraph F above; however, the knowledge test is not required if the applicant already has a powered aircraft rating. When applying for an additional category/class rating in a powered aircraft, the applicant must present at least a third-class medical certificate or, if operating under BasicMed in lieu of possessing a valid third-class medical certificate, a valid U.S. driver's license and a current Certificate of Completion from an authorized BasicMed medical education course.

H. Discrepancies. If a discrepancy that cannot be immediately corrected exists in any of the documents, return the application and all submitted documents to the applicant. Inform the applicant of the reasons for ineligibility and explain how the applicant may correct the discrepancies.

I. Conduct the Practical Test. After determining that the applicant is eligible and meets all prerequisites for the Commercial Pilot Certificate, category, or class rating, conduct the practical test in accordance with the applicable ACS or PTS.

1) An applicant who is retesting may be given credit for those areas of operation successfully completed on the previous practical test, provided the previous test was conducted

within 60 days before the retest. If the previous test was conducted more than 60 days before the retest, the evaluator must test the applicant in all areas.

2) If the practical test is not completed for reasons other than unsatisfactory performance, issue the applicant a Letter of Discontinuance (see Figure 5-31, Sample Letter of Discontinuance), only when the practical test is discontinued due to inclement weather conditions, aircraft airworthiness, or any other safety-of-flight concern. Return the application and all submitted documents to the applicant.

J. Unsatisfactory Performance. If the applicant did not meet the applicable standards for the certificate sought, inform the applicant of the reasons for the unsatisfactory performance.

1) Prepare in duplicate FAA Form 8060-5, as described in Volume 5, Chapter 1, Section 6.

2) List the areas of operation that were unsatisfactory.

a) If specific procedures and maneuvers need to be repeated, record them on FAA Form 8060-5.

b) Record the number of practical test failures on FAA Form 8060-5. Give a copy of this form to the applicant.

3) As appropriate, mail the completed certification file to the managing Flight Standards District Office (FSDO) no later than 7 calendar days after the completion of the test. Forward the completed file to AFB-720. Integrated Airman Certification and Rating Application (IACRA) files may be sent directly to AFB-720.

4) Return all submitted documents not forwarded to AFB-720 to the applicant.

5) As appropriate, sign an entry in the applicant's records after the practical test. That entry must show the type of test, the duration of the flight portion, the unsatisfactory outcome of the test, and the evaluator's designation number.

K. Satisfactory Performance. Issue FAA Form 8060-4 when the applicant has met all requirements for the certificate and/or rating sought.

1) Prepare FAA Form 8060-4 in duplicate as shown in Volume 5, Chapter 1, Section 5.

2) Enter the correct limitations, if appropriate, in the space provided on the Temporary Airman Certificate. Give a copy of the temporary certificate to the applicant. Below are some samples of limitations that may be placed on the pilot certificate.

a) If an instrument rating is added to a certificate using a single-engine airplane, and the applicant has a multiengine rating (land or sea), enter a VFR limitation for those multiengine privileges.

b) Enter "NOT VALID FOR FLIGHTS REQUIRING THE USE OF RADIO" if the applicant is hearing and/or speech impaired. Only an inspector may remove this limitation.

c) Enter "NOT VALID FOR CARRIAGE OF PASSENGERS FOR HIRE IN AIRPLANES ON CROSS-COUNTRY FLIGHTS OF MORE THAN 50 NM, OR AT NIGHT" if the airman has no instrument rating.

d) Enter any limitations carried forward from the Private Pilot Certificate if the applicant has not met the requirements for removal of those limitations.

3) If the pilot certificate is issued in a foreign country, refer to 14 CFR § 61.13(a) and 14 CFR part 187 appendix A.

4) Complete the appropriate sections of the application.

5) Verify that all information on FAA Form 8060-4 is correct. Sign FAA Form 8060-4 and direct the applicant to sign in Section VII.

6) As appropriate, mail the completed certification file to the managing FSDO no later than 7 calendar days after the completion of the test. Forward the completed file to AFB-720. IACRA files may be sent directly to AFB-720.

7) Return all documents to the applicant, except for the documents that are required to be submitted to AFB-720.

8) As appropriate, sign an entry in the applicant's records after the practical test. That entry must show the type of test, the duration of the flight portion, the satisfactory outcome of the test, and the evaluator's designation number.

L. SAS AR. An ASI will complete the SAS AR record.

5-410 TASK OUTCOMES. Completion of this task results in the issuance of one of the following:

- Temporary Airman Certificate—Commercial Pilot,
- Notice of Disapproval of Application, or
- Letter of Discontinuance.

5-411 FUTURE ACTIVITIES.

- The applicant may return for an added category, class, or type rating.
- The applicant may return for an upgraded certificate.

Figure 5-31. Sample Letter of Discontinuance

FAA Letterhead

[*Date*]

[*Applicant's name and address*]

Dear [*Applicant's Name*]:

On this date, you successfully completed the oral portion of the practical test for a [*indicate grade*] certificate with an [*indicate category*] category and [*indicate class*] class rating. The practical test was discontinued because of [*indicate reason*].

If application is made by [*indicate a date 60 days from date of letter*], this letter may be used to show the following portions of the practical test which have been completed satisfactorily:

[*Indicate pilot operations completed on the test.*]

After [*indicate expiration date*], you must repeat the entire practical test.

This letter does not extend the expiration date as shown on the knowledge test results, medical certificate, or required endorsements.

Sincerely,

[*Signed by the inspector conducting the practical test*]

RESERVED. Paragraphs 5-412 through 5-430.
